EXECUTIVE SUMMARY

The Help America Vote Act of 2002 (HAVA), 42 U.S.C. § 15301 *et seq.*, mandates that, for each regularly scheduled general election for Federal office, the United States Election Assistance Commission (EAC) shall collect comprehensive data from the States on all of the ballots sent and received by voters covered by the Uniformed and Overseas Citizens Absentee Voting Act of 1986 (UOCAVA), 42 U.S.C. § 1973ff.

This report, from EAC to Congress regarding UOCAVA voting, is based on information gathered from the Election Administration and Voting Survey (EAVS), which is administered to 50 States, the District of Columbia, and four territories. The survey, conducted biennially by EAC, asks for data at the county (or equivalent) level. The data provided by States concern the 2012 election cycle: the two-year period following the November 2010 mid-term election and the November 2012 presidential election.¹ The UOCAVA data come from one section of the larger EAVS.

Jurisdiction-level response rates improved for the 2012 EAC survey as compared to the 2010 survey, continuing a trend that allows for better monitoring of compliance with the mandated requirements of UOCAVA.² There were 3,476 more jurisdictions that participated in the survey than in 2010, largely as a result of a change in the reporting unit in Wisconsin.³ Some States do not track all the data items and some States are unable to provide data for all of their counties or county-equivalent jurisdictions. The number of total jurisdictions and the number of reporting jurisdictions are provided in the tables contained in this report. In addition, consistency across the States in the way data are collected remains uneven. Readers should be aware of these limitations as they review this report and use the data presented here and in the complete UOCAVA dataset available on the EAC website at www.eac.gov.

EAC's EAVS remains one of the primary tools by which Congress, Federal agencies, and the public can monitor compliance with UOCAVA. Among the highlights of the 2012 survey findings are:

1. States transmitted 876,362 ballots to UOCAVA-covered voters for the 2012 election, with just over half (51.7 percent) going to uniformed services members. Another 44.4

percent went to civilian citizens living overseas.⁴

2. Of the ballots transmitted, 69.2 percent (606,425) were returned and submitted for counting.
3. States reported counting 580,813 UOCAVA ballots, or 95.8 percent of the total submitted for counting.
4. States reported rejecting 33,762 ballots. The most common reason given for rejecting a UOCAVA ballot was that the ballot was not received on time or missed a deadline; States reported that 40.4 percent of rejected ballots were rejected for this reason.
5. States reported that 44,766 voters submitted a Federal Write-in Absentee Ballot (FWAB).

INTRODUCTION

The United States Election Assistance Commission (EAC) is an independent, bipartisan commission created by the Help America Vote Act of 2002 (HAVA). Its mission is to assist State and local election officials with the administration of Federal elections. EAC provides assistance by disbursing, administering, and auditing Federal funds for States to implement HAVA requirements; conducting studies and other activities to promote the effective administration of Federal elections; and serving as a source of information regarding election administration. Since 2004, EAC has collected data on voting, elections, and election administration in the United States. These data support three biennial reports: one on voter registration, one on voting by uniformed and overseas citizens, and one more generally on election administration and how Americans cast their ballots.

In 1986, Congress passed the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA), 42 U.S.C. § 1973ff. UOCAVA covers voting by members of the seven uniformed services and their eligible dependents; members of the U.S. Merchant Marine and their eligible dependents; Commissioned Corps of the U.S. Public Health Service and the National Oceanic and Atmospheric Administration; and U.S. citizens residing outside the United States. Under UOCAVA, States and territories are to provide a means for these citizens to register and to vote in elections for Federal office using absentee procedures.

UOCAVA also provides for the use of a Federal Write-in Absentee Ballot (FWAB), which can be cast under certain conditions by voters who have applied for but who have not yet received their absentee ballot. The FWAB is intended as a fail-safe for voters who might encounter problems receiving their ballot from local election offices in time to cast their vote.

Section 703(a) HAVA amended section 102 of UOCAVA by adding the following requirement:

⁴ The remaining 3.9 percent of the transmitted ballots fall into the "other voter" and "not categorized" categories.

¹ Throughout this report, the word "States" includes "States, territories, and the District of Columbia."

² Response rates improved in many areas of the EAVS survey in addition to UOCAVA. See U.S. EAC *The Impact of the National Voter Registration Act on the Administration of Elections for Federal Office, 2011-2012* available on the EAC website at www.eac.gov.

³ Wisconsin's reporting units in 2012 were municipalities. In prior reports, Wisconsin's data were aggregated to counties.

Not later than 90 days after the date of each regularly scheduled general election for Federal office, each State and unit of local government which administered the election shall (through the State, in the case of a unit of local government) submit a report to the Election Assistance Commission (established under the Help America Vote Act of 2002) on the combined number of absentee ballots transmitted to absent uniformed services voters and overseas voters for the election and the combined number of such ballots which were returned by such voters and cast in the election, and shall make such a report available to the general public.

Section 703(b) of HAVA further required that EAC work with two of its statutory Federal Advisory Committees, the Board of Advisors and the Standards Board, to develop a standardized format for reports submitted by States and units of local government and provide the standardized format to these jurisdictions.⁵

In October of 2009, the Military and Overseas Voter Empowerment (MOVE) Act was signed into law.⁶ The purpose of the law is to ensure that military personnel and overseas citizens have sufficient time to request and receive ballots, and that States allow enough time for the submitted ballots to be counted toward the election results. Provisions of the Act include protecting the security and integrity of the voter registration and ballot application process; ensuring the privacy and personal information of the voter and absentee ballots; establishing a means of electronic communication for all voting-related materials to UOCAVA voters; and establishing a ballot tracking mechanism to allow voters to confirm whether their ballots were received by the appropriate election official. The MOVE Act also eliminated the Federal requirement that ballots be automatically transmitted for two subsequent general election cycles.

This report presents EAC's fifth collection of UOCAVA data. States' collection and reporting of UOCAVA data have been improving since the first report, which was based on data collected for the 2004 Federal Election, though challenges remain. Currently there is no consistent way to accurately assess the number of overseas and uniformed services voters who may be covered by the Act. Unlike the data from the U.S. Census, there is no similar mechanism for measuring the number of civilian Americans living abroad. Further, it is difficult to gauge the number of domestic uniformed services voters who do not use UOCAVA's provisions for voting and instead vote at polling places on Election Day.

⁵ See 42 U.S.C. §§ 15341-46 for more information on the Board of Advisors and Standards Board.

⁶ Pub. L. No. 111-84, Subtitle H, 123 Stat. 2190

Consequently, readers should use caution when analyzing and presenting the data contained in this report.

In accordance with its obligation to report on the ballots sent and received by voters covered under UOCAVA, EAC submits this report to Congress. However, readers should note that since December 11, 2010, EAC has lacked a quorum of commissioners necessary to conduct certain business, including the formal adoption of Commission reports and the issuance of recommendations. In order for EAC to meet its responsibility to submit the UOCAVA report to Congress, however, EAC provides data in this document that would be contained in a formally-adopted report.

SURVEY METHODOLOGY

In 2012, as in previous years, EAC distributed two questionnaires to the States: a quantitative survey and a qualitative Statutory Overview, which asks States to report on their election laws, definitions, and procedures. In order to minimize the burden on States when preparing to respond to the survey, the 2012 survey contained only minor changes to both the Statutory Overview and the EAVS questionnaire from the 2010 versions. The final, approved version of the survey, posted on the EAC website in May 2012, contained 49 questions in the EAVS questionnaire and 22 questions in the Statutory Overview. A majority of the questions in both surveys contained sub-questions.

Guide to Terms

For the purposes of the survey, EAC provided the following definitions within the questionnaire and in supplemental instructions distributed to State election officials:

- **Transmitted ballots**, such as absentee ballots, are those ballots that are sent out from the election office to voters.
- **Spoiled ballots** are ballots that, under the applicable State law, are incorrectly marked or impaired in some way and turned in by the voter at the polling place or mailed in absentee. A replacement ballot is issued so that the voter can correctly mark the ballot; spoiled ballots are referred to in some States as a "voided" ballot.
- **Ballots returned and submitted for counting** include all ballots returned by voters that were submitted for the counting process regardless of whether or not the ballots were later counted or rejected. Spoiled ballots, replaced ballots, and absentee ballots returned as undeliverable are identified before the counting process and by this definition are not considered to be submitted for counting.
- **Counted ballots** are ballots that have been processed and the votes included in the candidates' vote totals.
- **Rejected ballots** are ballots that States determine do not meet the requirements of eligibility for various reasons, including not being properly completed, being submitted

by individuals who were excluded from voting in those locations, or not being received on time.

- **Federal Write-in Absentee Ballot (FWAB)** is an emergency ballot available to uniformed services and overseas citizens (including those located at APO and FPO addresses) when they have properly requested but have not received a regular absentee ballot from their local jurisdiction in time to return it before the States' deadline. Because FWABs are not sent out from an election office to a specific voter, they are not considered transmitted ballots. However, FWABs are included in the number of ballots returned and submitted for counting.

States' Collection of UOCAVA Information

For 2012, EAC continued its efforts to present the survey to State officials earlier in the election cycle and to facilitate the task of responding by providing improved survey instruments and increased technical assistance. The primary survey instrument designed to assist the States in collecting and reporting their statistical data was a Microsoft Excel-based template. The template offered the States two different methods for entering data: a form-based method that resembled the look of the questionnaire, and a sheet-based view that used a familiar spreadsheet format. Embedded in the Microsoft Excel-based template was a set of error-checking algorithms to help States check their data using logic and consistency rules before submitting their data to EAC. To further ease the data entry burden, the application was preloaded with each State's jurisdictions, and EAC provided a guide summarizing how to use the template to States.⁷ Most States chose to submit their data using this instrument via the EAVS project website or via email.

States were asked to send their responses to EAC by February 1, 2013. The data provided by the States were then checked for logic and consistency errors. Any errors or questions concerning the submitted data were referred back to the States for review and correction, if necessary. The States had two weeks to review and correct their submissions. Fifty-four States submitted their data to EAC.⁸

About the States' Data

In May 2010, EAC adopted a data policy to guide States' submission and verification of their survey data. The *Guide to the Election Administration and Voting Survey* document provides information to election officials responsible for com-

pleting the survey and offers EAC assurances about States' validation of the data. The Guide is available on EAC's website (www.eac.gov). The *Guide* contains information about:

- EAC processes related to releasing the survey instrument and final reports based on the survey data;
- the technical assistance EAC provides to the States;
- deadlines for submitting the survey data;
- the processes and procedures for States' submission of the data, including use of the data templates EAC provides;
- the processes and procedures for States' review, verification, and correction of the data; and
- instructions on how to address errors in the data after the submission deadline has passed.

In response to media and general public inquiries about State data cited in EAC's previous EAVS reports and the Federal government's recent policies related to data quality, EAC formally requested that States verify and certify in writing that the data they submit are accurate. For the 2012 EAVS, every State submitted with their data a certification page signed by its Chief State Election Official.⁹

The 54 States that responded to the 2012 survey varied in their approaches to and completeness of their election data collection. Most States relied, at least to some degree, upon centralized voter-registration databases (VRDs) and voter history databases, which allowed State election officials to respond to the survey with information from the local level for each question. Other States, conversely, collected relatively little election data at the State level and instead relied on cooperation from local jurisdiction election offices to complete the survey. States and local offices varied in resources required to complete the data collection and in the emphasis placed on data collection. Some States did not provide data in all the categories requested in the survey, and a few did not have data for all their local jurisdictions.

Section 4 of this report summarizes the results of the UOCAVA section of the 2012 EAVS and includes a set of detailed tables. The corresponding dataset, which includes States' responses to the UOCAVA portion of the survey, is available on EAC's website (www.eac.gov).

Caution is necessary when interpreting the survey data, particularly when comparing the data from year-to-year or State-to-State, due to changes in State data collection practices across time and the varying levels of completeness in many States' responses. Information on the number of jurisdictions in each State is provided in a number of tables.

⁷ States were allowed to change the list of jurisdictions to match their own reporting and administration systems. Some States, particularly those with township systems, may change the number of local jurisdictions administering elections from year to year, as towns run joint elections to ease the administrative burden.

⁸ The Virgin Islands was the only State that did not respond. Its name appears in the tables but without any data.

⁹ The numbers reported here from the States may differ from those provided elsewhere by the States. As these have been certified by the States' Chief Election Officials, they are considered by EAC to be the final and official statistics on UOCAVA voting.

Table 7. Selected Response Rates on UOCAVA Questions, Last Two Elections

UOCAVA Question	2012 Election Including Wisconsin		2012 Election (Excluding WI)	2010 Election (Excluding WI)	Change in Percentage Points (Excluding WI Jurisdictions)
	Jurisdictions Responding (out of 8,154)	Response Rate (%)	Response Rate (% out of 4,613)	Response Rate (% out of 4,606)	
Overseas citizen ballots transmitted	7,810	95.8	92.5	86.4	6.1
Overseas citizen ballots cast	7,747	95.0	91.2	88.3	2.9
Overseas citizen ballots counted	7,701	94.4	90.2	84.1	6.1
Uniformed services ballots transmitted	7,831	96.0	93.0	87.6	5.4
Uniformed services ballots cast	7,780	95.4	91.9	90.6	1.3
Uniformed services ballots counted	7,742	94.9	91.1	89.3	1.8
Overseas citizen FWABs cast	3,350	41.1	72.6	62.2	10.4
Uniformed services FWABs cast	3,432	42.1	74.4	63.7	10.7

Response Rates¹⁰

State data collection for the EAVS and reporting of UOCAVA data improved from the 2010 survey, but are still incomplete. Overall, the number of jurisdictions included in the EAVS increased from 4,678 in 2010 to 8,154 in 2012. This large increase in reporting jurisdictions between 2010 and 2012 is almost entirely attributable to Wisconsin switching from reporting data at the county level in 2010 to reporting data at the municipality level in 2012. The number of Wisconsin reporting jurisdictions increased from 72 in 2010 to 3,541 in 2012. Excluding Wisconsin, the number of jurisdictions nationwide increased slightly, from 4,606 in 2010 to 4,613 in 2012.

In the UOCAVA section of the EAVS, the proportion of jurisdictions responding increased in most categories from the 2010 election.¹¹ Table 7 summarizes the jurisdictions surveyed that were able to provide data for select questions.¹² As shown in Table 7, in 2012, a larger percentage of jurisdictions were able to report the numbers of ballots transmitted to overseas citizens and uniformed service members, as well as ballots submitted by overseas citizens that were counted, compared to 2010. In addition, reporting of the use of FWABs improved in 2012 for both overseas civilians and uniformed service members compared to 2010.

¹⁰ In this report, response rates are calculated as the number of jurisdictions providing data for a given question out of the total jurisdictions eligible for participation in the study.

¹¹ Wisconsin's jurisdictions were excluded from these response rate comparisons, as the disproportionately large increase in Wisconsin reporting jurisdictions from 2010 and 2012 would skew these results.

¹² Tables 1 through 6 are presented in *The Impact of the National Voter Registration Act on the Administration of Elections for Federal Office, 2011-2012*, available on the EAC website at www.eac.gov.

The 2012 survey instrument instructed States to check "Data not available" if the data for a particular question were not available and "N/A" if a question was not applicable to a State or county. If a State entered a "0," that response was treated as a valid response equaling "0." A "blank" response was treated as a nonresponse.

SURVEY RESULTS

The process by which UOCAVA voters participate in elections varies by State and, in some instances, even within States. The survey captures information on three basic steps in the UOCAVA voting process:

- the ballot is transmitted to the voter;
- the ballot is returned by the voter to the election office; and
- the ballot is accepted and counted, or the ballot is rejected.

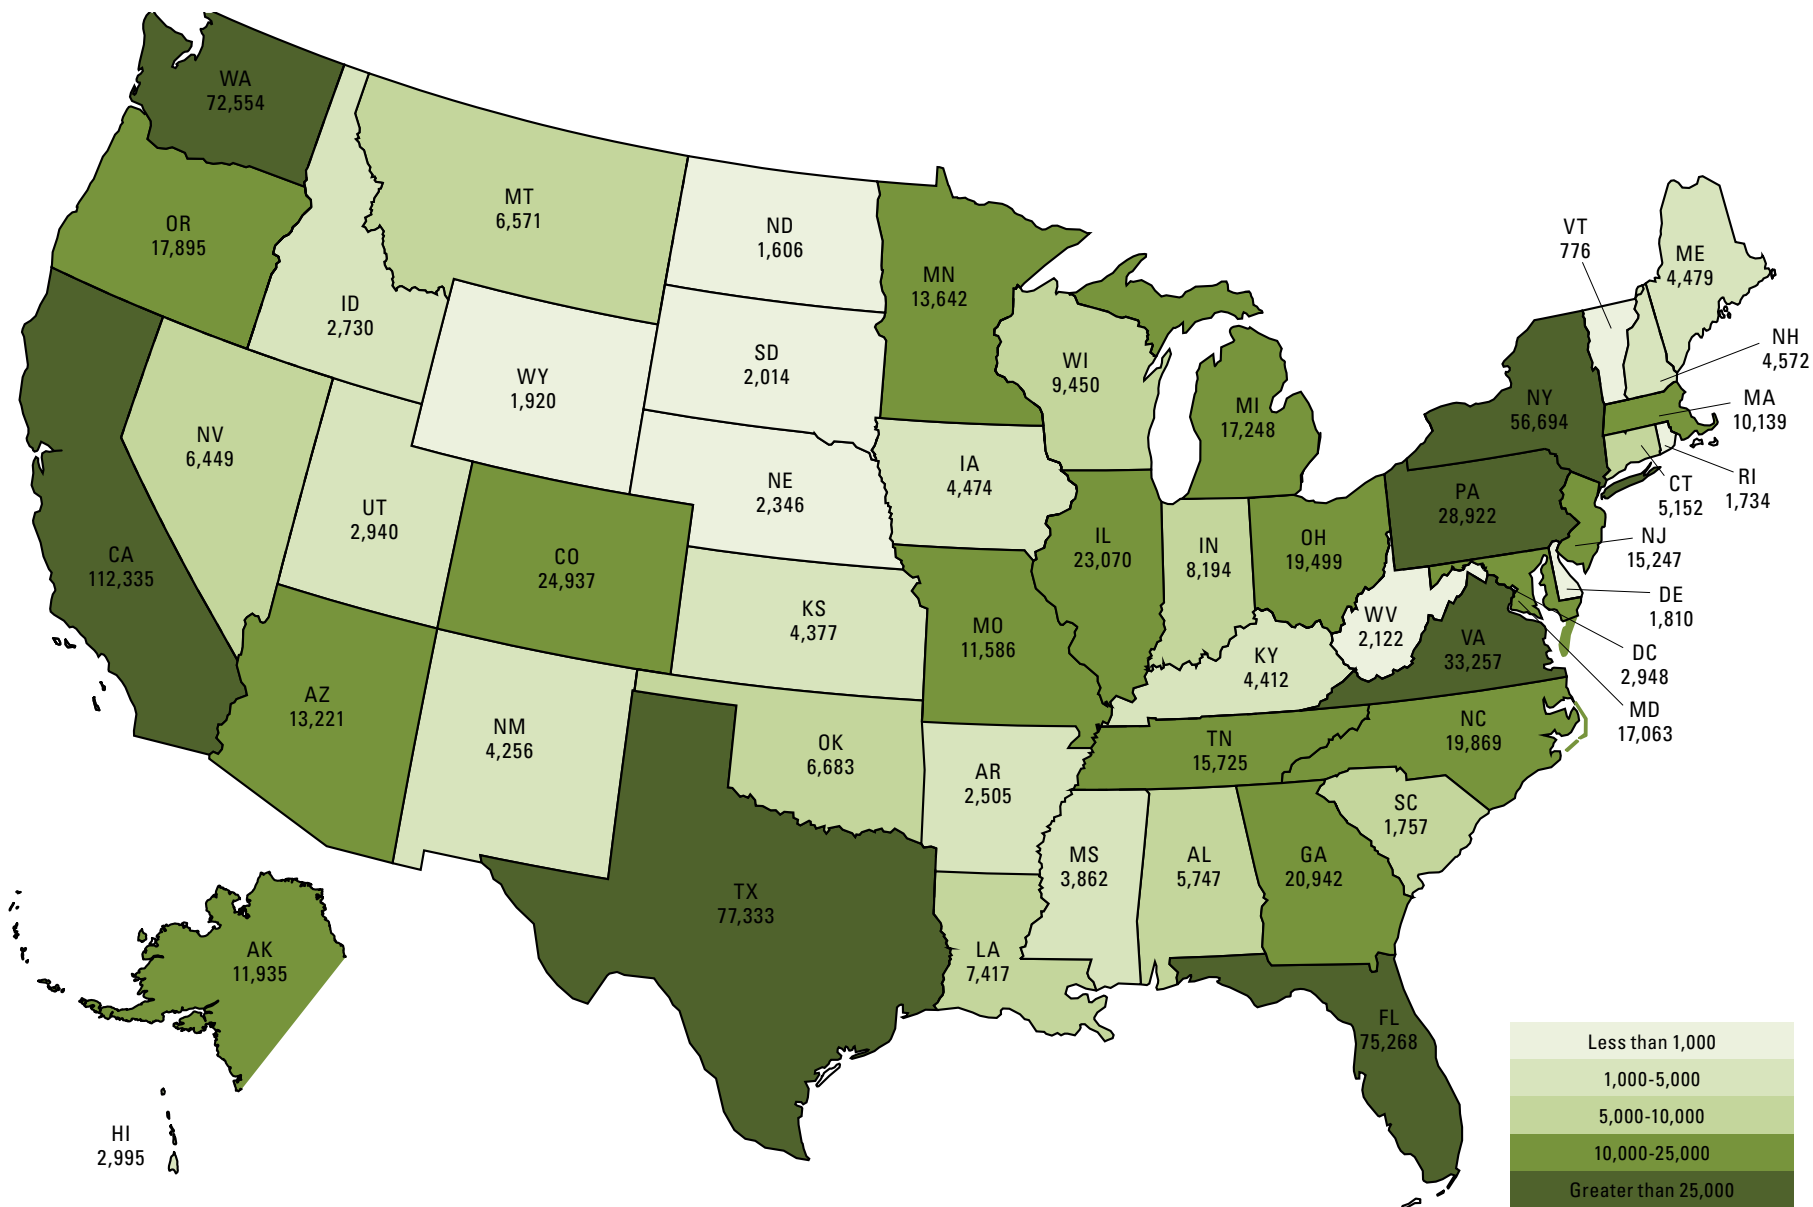

I. Ballots Transmitted

States reported transmitting 876,362 ballots, spread unevenly over the 54 States, with five States reporting transmitting more than 50,000 ballots each. Together, Florida, California, Washington, Texas, and New York accounted for nearly half of all UOCAVA ballots transmitted in the United States.

Florida	115,114
California	112,355
Texas	77,333
Washington	72,554
New York	56,694

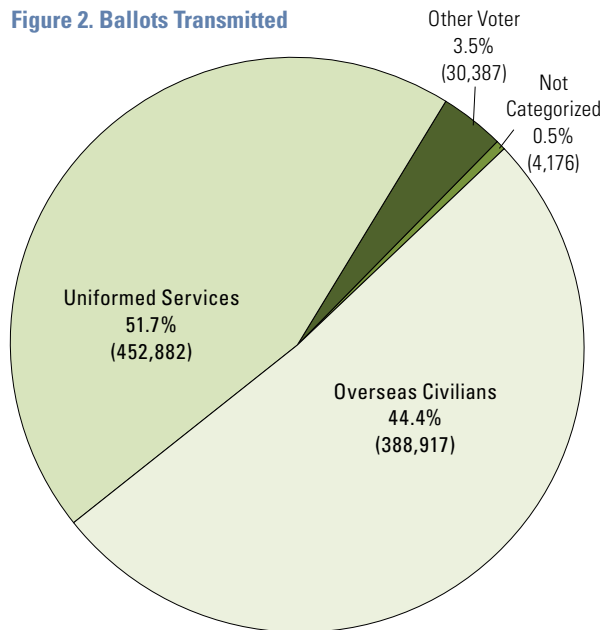

Over half of the ballots transmitted nationwide (452,882, or 51.7 percent) were sent to members of the

**Figure 1. Number of Ballots Transmitted to UOCAVA Voters
November 2012 General Election***

Note: The data presented in this map are based on responses to question B1 and also appear in Table 8 of this report.

Figure 2. Ballots Transmitted

uniformed services (see Table 8).¹³ An additional 44.4 percent of the ballots were sent to civilians living overseas. The remaining 3.9 percent of the transmitted ballots fall into the “other voter” and “not categorized” categories. At the State level, about three-fifths of the States reported that ballots for uniformed services voters made up a majority of their UOCAVA ballots transmitted, although the proportions varied by State. In Kansas, for example, UOCAVA ballots were split about evenly between uniformed services and civilian voters, whereas in Washington, members of the uniformed services were sent 69.3 percent of UOCAVA ballots. Of the 32 States that transmitted more than 5,000 UOCAVA ballots, 12 reported sending more ballots to civilian voters than uniformed services voters, including Arizona, California, Colorado, Indiana, Maryland, Massachusetts, Minnesota, New Jersey, New York, Oregon, Utah, and Virginia.

The 2012 survey found that nearly all States were able to provide data concerning the UOCAVA ballots transmitted by type of voter.

All States reported the disposition of at least some of their transmitted ballots (See Table 9). Of all the ballots transmitted, 22.2 percent of ballots were reported to have an unknown status, which may have included ballots not received or returned. Other ballot dispositions included spoiled or replaced ballots (2.0 percent), ballots returned as undeliverable (1.4 percent), other disposition (0.3 percent), and unable to be categorized as to their disposition (8.0 percent). Most States provided the number of ballots submitted for counting while fewer States were able to provide

counts of ballots returned as undeliverable and spoiled or replaced ballots.

II. Ballots Submitted for Counting

The proportion of ballots submitted for counting from members of the uniformed services and civilian voters was roughly the same as for ballots transmitted (see Table 10). Ballots from members of the uniformed services comprised 52.6 percent (319,182 ballots) of the ballots submitted for counting, while ballots from civilians comprised 45.9 percent (278,212 ballots) of the 606,425 total ballots submitted. Among the States with the most UOCAVA voters, New York and California reported having more civilian than uniformed services ballots submitted, whereas the opposite was true for Florida, Texas and Washington, similar to 2008 and 2010. Overall, 31 States reported more uniformed services ballots submitted than civilian, whereas 20 States had more civilian ballots than uniformed services ballots submitted; the remaining three States (Iowa, Rhode Island, and South Carolina) did not provide a breakdown of the number of military or overseas civilian voters.

The rate of return of UOCAVA ballots in 2012 was slightly smaller than in the presidential election in 2008 but significantly larger than in the 2010 midterm election. In 2008, 69.0 percent of ballots transmitted were returned for counting compared to 66.0 percent in 2012. By comparison, in 2010, 34.7 percent of ballots transmitted were returned for counting.

Federal Write-in Absentee Ballots

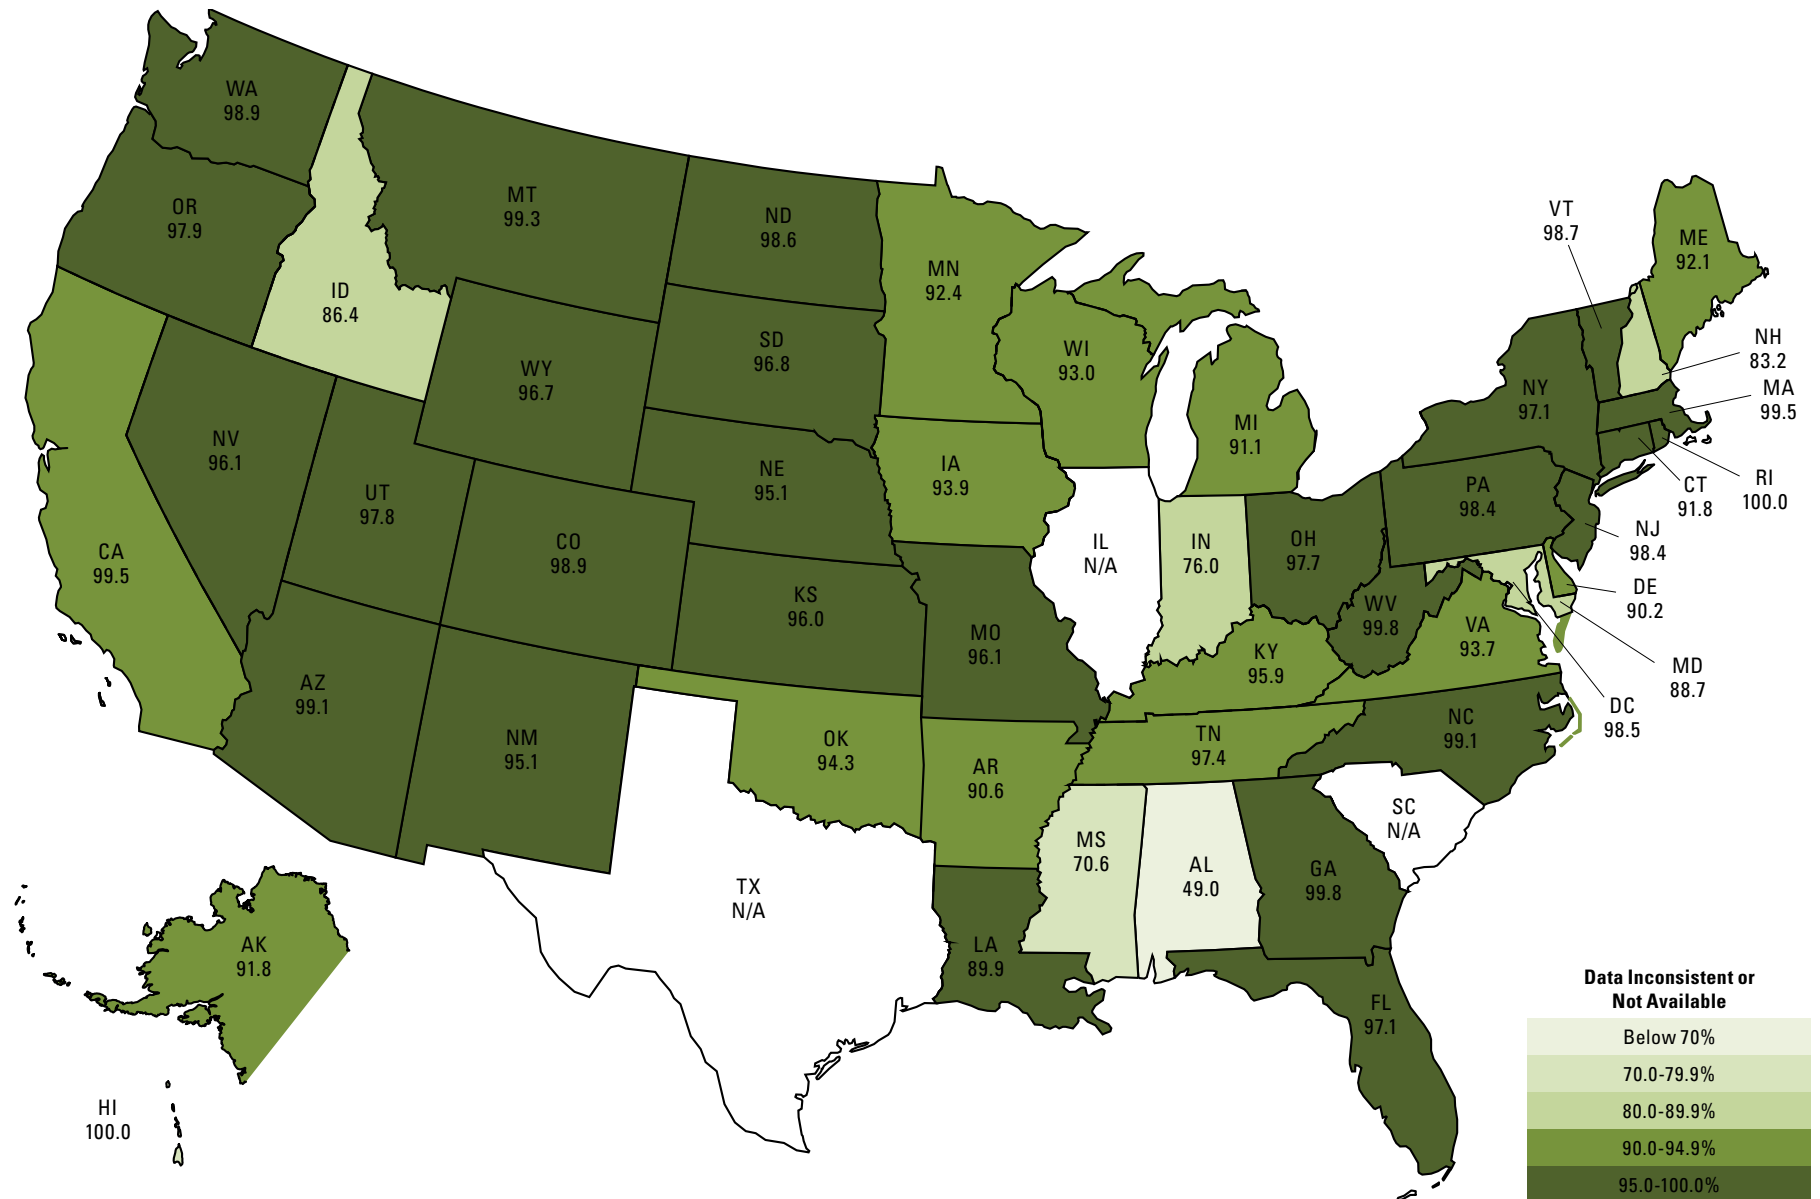

Section 103 of UOCAVA generally provides a mechanism for overseas uniformed services and civilian voters to cast a Federal Write-in Absentee Ballot (FWAB) (See 42 U.S.C. § 1973ff-2). These ballots are available to uniformed services voters and voters living outside the United States who requested but did not receive the regular absentee ballots after having submitted a timely application for the ballot. The FWAB allows voters to cast a ballot for Federal offices only (President/Vice-President as applicable, U.S. Senator, U.S. Representative, Delegate or Resident Commissioner). Some States allow members of the uniformed services and overseas citizens to use the FWAB for elections other than Federal elections.

The use of the FWAB is allowed only under certain conditions. The FWAB is available through Voting Assistance Officers (VAOs) at military installations, at U.S. embassies or consulates, or on the Federal Voting Assistance Program’s (FVAP) website. The absentee uniformed services voter must:

- be absent from his or her voting residence;
- have applied for a regular ballot early enough so that the

¹³ All tables after Table 7 appear in the appendix of this report.

**Figure 3. Percentage of UOCAVA Ballots Submitted that were Counted
November 2012 General Election***

Note: The data presented in this map are based on responses to questions B3 and B8 and also appear in Table 18 of this report. Illinois did not provide data for ballots cast or ballots counted. South Carolina provided data for ballots cast, but not ballots counted. Data provided by Texas yielded inconsistent findings.

request is received by the appropriate local election officer not later than the State deadline, or the date that is 30 days before the general election; and

- have not received the requested regular absentee ballot from the State.

The citizen outside the United States must:

- be located outside the United States (including those located at APO/FPO addresses);
- have applied for a regular ballot early enough so that the request is received by the appropriate local election officer not later than the State deadline, or the date that is 30 days before the general election; and
- have not received the requested regular absentee ballot from the State (42 U.S.C. § 1973ff).

Most of the ballots submitted by UOCAVA voters were absentee ballots issued by the local election office (see Table 11), rather than through the use of the FWAB. States reported that 76.0 percent of the ballots submitted were regular absentee ballots issued by the jurisdiction. States also reported that 44,766 FWABs were submitted, which accounted for 7.4 percent of the total number of UOCAVA ballots submitted for counting. The number of FWABs submitted for counting in the 2012 election was significantly higher than in the 2008 presidential election, when 28,131 FWABs, or 4.1 percent of the total number of UOCAVA ballots, were submitted. This could be due, at least in part, to improvements in reporting between 2008 and 2012. Five States reported that more than 20 percent of their absentee ballots were FWABs: Delaware, Iowa, North Carolina, Oklahoma, and the District of Columbia. Seven States were unable to categorize the type of ballot used by UOCAVA voters, the same number as in 2010, but an improvement over 2008, when eleven States were unable to provide this information.

FWAB usage remains a relatively small proportion of UOCAVA voting for both uniformed services and civilian voters. FWABs were 6.6 percent of the total ballots submitted for counting by uniformed services voters and 7.5 percent by civilian UOCAVA voters. Tables 12 and 13 break down the type of ballot submitted by members of the uniformed services and civilian UOCAVA voters, respectively.

III. Ballots Counted and Rejected

Of the 606,425 total ballots submitted by UOCAVA voters including FWABs, 580,813, or 95.8 percent, were counted by

the States (see Table 18).¹⁴ Military voters made up a larger share of the votes counted than civilian voters, 52.4 percent to 45.4 percent (see Table 14). Use of the FWAB resulted in at least 29,497 ballots being counted in the 2012 election; this figure may be higher as all States were not able to provide a breakdown of their UOCAVA ballots (see Table 15).

Fifty-two States reported the total number of UOCAVA ballots counted, and the rates of ballots cast that were counted varied among States (see Table 18). All but one State reported more than 70 percent of ballots cast having been counted, and most States were in the range of 90 to 100 percent of ballots counted (see Figure 3).¹⁵

In the 2012 Federal election, 52 States reported rejecting 33,762 UOCAVA ballots that had been submitted for counting. Data on these rejections are presented in Tables 20 through 25. Several States rejected UOCAVA ballots at higher rates when compared to other States' data, as measured by the ratio of rejected to counted UOCAVA ballots (see Tables 25 through 27). Hawaii, American Samoa, and Puerto Rico counted all of their submitted ballots and rejected zero. Indiana, on the other hand, counted 5,468 ballots (76.0 percent) and rejected 1,481 (20.6 percent).

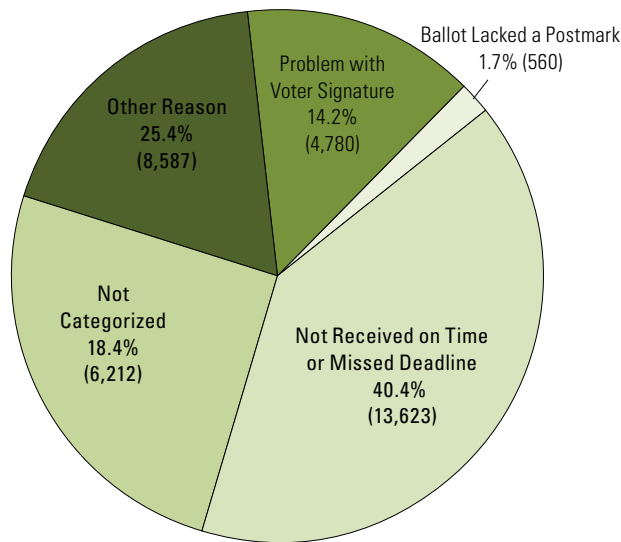

Ballots from uniformed services and civilian voters made up approximately the same proportion of rejected ballots as they also did for ballots cast and ballots counted (41.0 percent of rejected ballots were from uniformed services voters, and 47.1 percent of rejected ballots were from civilian voters).

Of particular interest is the reason UOCAVA ballots were rejected. Data on this topic are presented in Table 24. There were 33,762 UOCAVA ballots rejected in 2012. The most common reason for the rejection of UOCAVA ballots was missed deadlines; 40.4 percent of the rejected ballots were not counted for this reason.

Another 4,780 ballots (or 14.2 percent) were rejected because of problems with a required voter signature; for

¹⁴ The reported percentages of UOCAVA ballots that were counted do not take into account whether the same number of cases (generally, counties) were used in both the numerator and denominator. For example, nationwide, Table 18 reports 95.8 percent of UOCAVA ballots counted as a percentage of those cast. However, Alabama, New Mexico, and South Carolina report ballots counted from fewer jurisdictions than they do for ballots cast, whereas Arkansas, Mississippi, Texas, and Vermont reported ballots counted for more counties than reported ballots cast. Differences in the response rates within States for individual data items appear throughout the NVRA, UOCAVA, and Election Administration and Voting Survey studies. Data for all three studies are available on the EAC website at www.eac.gov.

¹⁵ Alabama reported that 49.0 percent of submitted UOCAVA ballots were counted. However, more than half of its counties did not report data on the number of counted UOCAVA ballots, whereas nearly all jurisdictions reported the number of ballots cast.

Figure 4. Reasons for Rejected UOCAVA Ballots

example, the signature may not have matched the signature on file, or it may have been missing altogether. States reported a variety of other reasons for rejecting UOCAVA ballots; these are listed in the county-level data available from EAC's website at www.eac.gov.¹⁶

Notably, and consistent with past survey data, FWABs were more likely to be rejected than regular State absentee ballots. FWABs made up 33.1 percent of rejected UOCAVA ballots, although they were only 7.4 percent of the ballots submitted for counting (see Table 21). States reported receiving 44,766 FWABs and rejecting 11,168, or 24.9 percent. Almost two-thirds of all rejected FWABs were in four States – California, Maryland, New York, and Texas.

HIGHLIGHTS

States reported transmitting more than 876,000 UOCAVA ballots to overseas civilian and uniformed services voters in 2012, and more than 606,000 of these ballots were returned and submitted for counting by voters. The disposition of the approximately 270,000 remaining ballots is difficult to discern; States often lack the ability or resources to track transmitted ballots that are not returned.

States' collecting and reporting of UOCAVA data are improving. Overall, there were an additional 3,476 counties (or county-equivalent jurisdictions) included in the survey, from 4,678 in 2010 to 8,154 in 2012; this is largely due to a

change in reporting unit for Wisconsin. For the 2012 Federal election, in key categories, nearly all States were able to report totals, generally at the county-level. For example, all 54 States were able to report the number of UOCAVA ballots transmitted, and 53 States were able to report the number of UOCAVA ballots submitted for counting and the number of ballots counted. At more detailed levels, however, the need for improvements in data collection remains. For example, data are less complete with regard to the number of FWABs rejected and the reasons for rejection.

The findings presented in this report are a high level analysis of the results of the UOCAVA data provided by States for the 2012 Federal election. Readers are encouraged to analyze the data in much greater detail; data files are available on EAC's website at www.eac.gov.

MOVING FORWARD

The quality of information regarding UOCAVA ballots continues to improve, and the 2012 survey data yielded a more complete picture of UOCAVA balloting than past surveys. States are generally making significant strides in designing their data management systems to produce the necessary data on UOCAVA voters. Gaps in State tracking of UOCAVA voters remain, however, and continued attention to data collection on UOCAVA voters and their ballots is needed. EAC will continue to work with States to seek ways to distinguish UOCAVA ballots from domestic civilian absentee ballots; refine their database categorizations, particularly for the reasons ballots are rejected; and improve tracking of FWABs.

Recent research on UOCAVA voting, including this report, is beginning to provide a more complete picture. Overseas eligible voters are harder to reach and study than those living in the United States. Consequently, very little is known about why the number of UOCAVA ballots cast is so much lower than the estimated number of eligible voters overseas. EAC is committed to facilitating State and local efforts to collect and report complete EAVS survey data on overseas and military voting in order to improve UOCAVA data that is required to meet statutory reporting requirements and to provide a clearer picture of UOCAVA voting over time. To further assist with this goal, and to further improve the efficiency of UOCAVA data collection, in 2014 EAC will collaborate with the Federal Voting Assistance Program to collect data on UOCAVA voters.

¹⁶ Reasons provided include: the voter was deceased, the voter name or address did not match the application, no absentee ballot application was on file, and the voter was inactive or "pending," among many other reasons.

FOOTNOTES TO TABLES

General Notes:

State: In the interest of consistency in these tables, the term State includes the District of Columbia and the four territories of American Samoa, Guam, Puerto Rico and the Virgin Islands.

Jurisdictions in the Survey: For the 2012 survey, information was requested for each local election administration jurisdiction. Generally this would be the county or county equivalent in each State. The following exceptions may apply:

- a. The information was compiled by town, city, or township in Wisconsin and the six New England States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.
- b. Some independent cities were treated as counties for reporting purposes in the States of Illinois, Maryland, Missouri, Nevada, and Virginia.
- c. The response was one record for the whole entity for Alaska, the District of Columbia, and the reporting territories.
- d. In Hawaii, information for one county, Kalawao, was reported with Maui County.

Exceptions are noted by an asterisk below the State name in Table 1a in "The Impact of the National Voter Registration Act of 1993 on the Administration of Elections for Federal Office 2011-2012."

Missing Data: Information for certain items remains unavailable for some States for many reasons. Missing data are presented in the tables by a blank data cell or a zero value depending on how the State answered the question. Note that a zero value may also indicate that the jurisdiction does not know or does not collect the information. The count of cases, included in most tables but not for all variables, reflects the presence of a response from the jurisdic-

tion including reported zeros. For many questions, zero is a valid response. In some cases, however, it is unclear if a response of zero is a valid response or an indication of "Data not available" or "Data not applicable" options. Researchers should consult the jurisdiction-level dataset for more detail. If a calculation is impossible because of missing information, a separate symbol may be indicated, e.g., a series of periods (. . . .).

Sum of Above: The information listed in the tables below the State level detail is, for most columns, simply the arithmetic sum of the information listed in the table. The number of States providing information is indicated as the count of States with information greater than or equal to zero, or in some cases, less than or equal to zero. The percentages indicated on this line are generally the result of a simple division based upon the relevant numbers from this line. For the "Not Categorized" columns, the number and percentage in the "Sum of Above" line will generally reflect a calculation of the relevant fields listed on this line.

States were given the option of answering "Data not available" and, for some questions, "Data not applicable." The "cases" columns listed in the tables show all reporting units (i.e., counties, townships, precincts, etc.) in which a State responded with a number, whether zero or higher. In some cases, States may have responded with a zero instead of "Data not available" or "Data not applicable," or vice versa. A blank cell in the table could represent missing data or the selection of "Data not available" or "Data not applicable" across all reporting units in the State. The "States Included" rows report the number of States in which a State responded with a number, whether zero or higher. Complete data for the UOCAVA section of the survey can be downloaded at www.eac.gov.

Specific Notes for Tables: Notes specific to each table appear following each table or group of sub-tables.

Table 8. UOCAVA Ballots Transmitted: Type of Voter

Question B1. Number of UOCAVA ballots transmitted and type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B1	
Arkansas	One county reported one ballot counted, one not returned, and one returned too late. Another county stated, "B1d: Not transmitted-sent FWAB in."
Arizona	One county commented, "Arizona allows for 'electronic' distribution and return of UOCAVA ballots. Of the 7,697 early ballots sent to UOCAVA voters, 4,891 (64%) were sent electronically (via email or fax), per the voter's request, which allowed for instantaneous receipt of the ballot by the UOCAVA voter. 2,161 of the electronically-sent ballots were to 'Uniformed Service' voters and 2,730 of the electronically-sent ballots were sent to 'Non-Military/Civilian Overseas' voters." A second county stated that federal write-in ballots are not "transmitted" to the UOCAVA voters, but they were included as such. A third county stated, in regards to B1d, that one voter contacted the office regarding voting in the general election; the office requested a completed FPCA, but the voter did not comply.
California	One county commented, "B1d-replacement ballot."
Florida	Bay County stated, "Bay County ran the numbers again, and they are correct. Bay County has a vast amount of UOCAVA voters due to the two bases, Tyndall Air Force Base and US Navy Base." Another county indicated this data was drawn from VR EAC Report. Escambia County commented, "VR Systems has been working with Escambia County on this survey. Escambia County has double-checked the total in B1a and feels it is correct as is. They do not understand how there can be an upper limit on the number/percentage of any type of absentee or other ballot compared to total registered voters. Escambia County has a very large number of UOCAVA voters." Okaloosa County stated, "Okaloosa County has double-checked the total in B1a and feel it is correct as is. Okaloosa County is home to the largest Air Force base in the world with additional forces representing all five services branches--Army, Navy, Marine Corps, and Coast Guard." Santa Rosa County commented, "Santa Rosa has double-checked the total in B1a and feel it is correct as is. Santa Rosa County has 15,783 UOCAVA voters registered. They have one military installation in their county and two others in neighboring counties."
Maine	Three jurisdictions commented that the total UOCAVA figures are correct.
Missouri	One county stated, "1 came to office to vote." A second counted indicated, "military base."
New Hampshire	Two jurisdictions commented that B1 reflected multiple requests from single individuals.
New Mexico	Another county stated, "UOCAVA Report/PSR Report."
Rhode Island	All jurisdictions commented that recent changes to Rhode Island General Law consolidated all UOCAVA ballots into one mail ballot category.
Tennessee	One county stated that its system does not designate between military and overseas voters; all are coded the same, and the total should be 278. The county also stated that it is home to Fort Campbell military base, which is why UOCAVA voters exceed domestic absentee voters.
Vermont	One jurisdiction indicated that only overseas ballots were included. Another jurisdiction noted there may be some military voters that were included in the county of 21 overseas voters because they did not specify if they were in the military. A third jurisdiction indicated that it received no requests at all for overseas ballots.
Washington	Four counties indicated they had a high number of UOCAVA ballots due to military bases.
Wyoming	For all counties, B1a does not include FWABs.

Table 9. UOCAVA Ballots Transmitted: Disposition of Ballots

Question B2. Number of UOCAVA ballots transmitted and disposition of the ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B2	
Arkansas	One county received two FWABs. In reference to B2e, another county indicated that one ballot was returned but it did not include the voter statement, so the ballot was not submitted for counting. A third county commented that six UOCAVA came in after election.
Arizona	One county commented that spoiled or replaced ballots are not tracked since the voter would have been reissued a new ballot, and in that circumstance, the ballot would then be part of the "Returned by Voter" total or part of the "Status Unknown" total.
California	One county stated, "Replacement Ballots 358." A second county noted the total number of UOCAVA ballots transmitted was 1075, and the breakdown should include B2a-B2f.
Colorado	All counties noted that section B2c includes both ballots voided at the voter's request and those voided by the system.
Florida	One county noted B2 include its 10 day count. A second county stated, "Data: VR EAC Report." A third county stated that ballots received after the deadline are "invalid," and therefore no official action is required to "reject" them. As of 01/02/2013, this county had received 78 "late" ballots from UOCAVA voters.
Hawaii	One county stated, "Status of 16 Federal only ballot unknown."
Missouri	One county commented that FWABs are not transmitted to UOCAVA voters but are received. A second county stated that three UOCAVA ballots were received after the deadline to be counted. A third county stated, "B2c. (69) is the number of re-mailed absentee ballots."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Vermont	One jurisdiction stated that four ballots were received after the election and therefore were not counted, but they are not unaccounted for. A second jurisdiction stated, "One ballot was never returned. One ballot was sent to China into her spam email. We finally realized the issue. She returned it immediately, but it was received after the 11/18/2012 deadline." A third jurisdiction commented, "Requestor called to cancel absentee ballot sent to Russia as she was staying in Vermont after ballot was mailed. She signed affidavit & ballot was replaced."
West Virginia	All counties commented there was no tracking for UOCAVA ballots not returned by voter.

Question		B3		B4a			B4b			B4c			calc	

Table 10. UOCAVA Ballots Submitted for Counting: Type of Voter

Question B3 and B4. Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B3	
Arkansas	One county indicated, "11 UOCAVA, 1 Write-In, 1 Civilian," and a second county stated that two ballots were FWABs. A third county indicated that it was unable to track FWABs. Another county stated that these UOCAVA ballots were the 7 that were returned and submitted for counting.
Arizona	FWABs were not transmitted by La Paz County, but one (1) FWAB was received, thus increasing the total in B3a to 7.
California	One county stated, "application method." A second county commented, "Ballots 2109 FWABs 87."
Florida	One county indicated, "2 FWAB," and another county indicated, "5 FWAB." A third county stated that B2a does not include 33 FWABs returned from voters who were not registered for this election and 2 regular ballots returned for another county. A fourth county commented, "AB 1659 + FWAB 74."
Iowa	Includes ballots transmitted as well as FWABs and special write-in absentee ballots returned. This number may be higher than the number of ballots transmitted.
Idaho	Seven counties noted that there were 54, 3, 15, 2, 1, 16 and 5 FWABs received, respectively, without the voter having previously requested an absentee ballot from the County Clerk's Office. These FWABs were not counted. These and six other counties commented, "Received Warning 'B13a + B3a cannot exceed B1a' for this county. But B3a includes all ballots returned, including those that were later rejected. You can't add B3a and B13a to get B1a, as B3a already includes B3a."
Missouri	One county stated that it received two FWABs.
North Dakota	Forty-seven counties stated, "Zero FWAB." 4 counties indicated, "One FWAB." One county stated, "Three FWAB," and another county indicated, "Six FWAB."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated "133 UOCAVA + 20 FWABs." Four counties stated, "B3a is greater than B1a due to the FWABs received."

Table 10. UOCAVA Ballots Submitted for Counting: Type of Voter

Question B3 and B4. Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B4	
Arkansas	One county commented that its county clerk's office does not see the FWABs after they are opened to know if they are uniformed service or overseas civilian voters.
Arizona	One county commented that it did not track FWABs and UOCAVA ballots.
California	One county commented "Application method." Another county noted that FWABs are not tracked by type; all were added into uniformed services voters. A third county stated that FWAB stats are included in the overall counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballot types in the same statistic (included in B4).
Florida	One county commented, "Data: VR EAC report."
Iowa	Seventy-nine counties commented, "We are unable to distinguish the UOCAVA ballots returned from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots returned in B4c."
Missouri	In response to question B4, four counties noted that FWABs are not transmitted to UOCAVA voters but are received.
New Mexico	One county commented, "UOCAVA Report/PSR Report."
Oregon	Oregon does not track what type of ballot is returned.
Vermont	For questions B4 through B7, one jurisdiction commented, "1 was not returned and 1 was returned after the 11/18 deadline."
West Virginia	Cannot track type of UOCAVA absentee ballot application.
Wyoming	Fifteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question		B4b		B5b			B6b			B7b			calc	

Tables 11, 12, and 13. UOCAVA Ballots Submitted for Counting: Type of Ballot, All Voters; Uniformed; Civilian

Questions B3, B4, B5, B6, B7. Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of ballot and type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B3	
Arkansas	One county indicated, "11 UOCAVA, 1 Write-In, 1 Civilian," and a second county stated that two ballots were FWABs. A third county indicated that it was unable to track FWABs. Another county stated that these UOCAVA ballots were the 7 that were returned and submitted for counting.
Arizona	FWABs were not transmitted by La Paz County, but one (1) FWAB was received, thus increasing the total in B3a to 7.
California	One county stated, "application method." A second county commented, "Ballots 2109 FWABs 87."
Florida	One county indicated, "2 FWAB," and another county indicated, "5 FWAB." A third county stated that B2a does not include 33 FWABs returned from voters who were not registered for this election and 2 regular ballots returned for another county. A fourth county commented, "AB 1659 + FWAB 74."
Iowa	Includes ballots transmitted as well as FWABs and special write-in absentee ballots returned. This number may be higher than the number of ballots transmitted.
Idaho	Seven counties noted that there were 54, 3, 15, 2, 1, 16 and 5 FWABs received, respectively, without the voter having previously requested an absentee ballot from the County Clerk's Office. These FWABs were not counted. These and six other counties commented, "Received Warning 'B13a + B3a cannot exceed B1a' for this county. But B3a includes all ballots returned, including those that were later rejected. You can't add B3a and B13a to get B1a, as B3a already includes B3a."
Missouri	One county stated that it received two FWABs.
North Dakota	Forty-seven counties stated, "Zero FWAB." 4 counties indicated, "One FWAB." One county stated, "Three FWAB," and another county indicated, "Six FWAB."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated, "133 UOCAVA + 20 FWABs." Four counties stated, "B3a is greater than B1a due to the FWAB ballots received."

Tables 11, 12, and 13. UOCAVA Ballots Submitted for Counting: Type of Ballot, All Voters; Uniformed; Civilian

Questions B3, B4, B5, B6, B7. Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of ballot and type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B4	
Arkansas	One county commented that its county clerk's office does not see the FWABs after they are opened to know if they are uniformed service or overseas civilian voters.
Arizona	One county commented that it did not track FWABs and UOCAVA ballots.
California	One county commented "Application method." Another county noted that FWABs are not tracked by type; all were added into uniformed services voters. A third county stated that FWAB stats are included in the overall counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballot types in the same statistic (included in B4).
Florida	One county commented, "Data: VR EAC report."
Iowa	Seventy-nine counties commented, "We are unable to distinguish the UOCAVA ballots returned from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots returned in B4c."
Missouri	In response to question B4, four counties noted that FWABs are not transmitted to UOCAVA voters but are received.
New Mexico	One county commented, "UOCAVA Report/PSR Report."
Oregon	Oregon does not track what type of ballot is returned.
Vermont	For questions B4 through B7, one jurisdiction commented, "1 was not returned and 1 was returned after the 11/18 deadline."
West Virginia	Cannot track type of UOCAVA absentee ballot application.
Wyoming	Fifteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question B5	
Arkansas	One county commented that its county clerk's office does not see the FWAB after they are opened to know if they are uniformed service or overseas civilian voters.
Arizona	One county commented that it did not track FWABs and UOCAVA.
California	One county commented "Application method." Another county noted that FWABs are not tracked by type; all were added into uniformed services voters. A third county stated that FWAB stats are included in the overall counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballot types in the same statistic (included in B4).
Florida	One county commented, "Data: VR EAC report."
New Mexico	One county commented, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot returned.
Vermont	For questions B4 through B7, one jurisdiction commented, "1 was not returned and 1 was returned after the 11/18 deadline."
West Virginia	Cannot track type of UOCAVA absentee ballot application.
Wyoming	Fifteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Tables 11, 12, and 13. UOCAVA Ballots Submitted for Counting: Type of Ballot, All Voters; Uniformed; Civilian

Questions B3, B4, B5, B6, B7. Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of ballot and type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B6	
Arkansas	One county commented that its county clerk's office does not see the FWAB after they are opened to know if they are uniformed service or overseas civilian voters.
California	One county commented "Application method." Another county noted that FWABs are not tracked by type; all were added into uniformed services voters. A third county stated that FWAB stats are included in the overall counts for all UOCAVA ballots.
Arizona	One county commented that it did not track FWABs and UOCAVA.
Connecticut	Connecticut currently accounts for all ballot types in the same statistic (included in B4).
Florida	One county commented, "Data: VR EAC report."
Oregon	Do not track what type of ballot returned.
Vermont	For questions B4 through B7, one jurisdiction commented, "1 was not returned and 1 was returned after the 11/18 deadline."
West Virginia	Cannot track type of UOCAVA absentee ballot application.
Wyoming	Fifteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question B7	
Arkansas	One county commented that its county clerk's office does not see the FWAB after they are opened to know if they are uniformed service or overseas civilian voters. One county commented, "B7: 2 ballot safe absentees (1 issued) and downloaded and 1 issued but not downloaded. Both returned and accepted."
Arizona	One county commented that it did not track FWABs and UOCAVA.
Connecticut	Connecticut currently accounts for all ballot types in the same statistic (included in B4).
Florida	One county commented, "Data: VR EAC report." One county noted B7 refers to e-mailed ballots. Another county indicated B7 refers to State write-in absentee ballots.
New Hampshire	B7 "OTHER" = Fed Ballot Only.
Oregon	Do not track what type of ballot returned.
Vermont	For questions B4 through B7, one jurisdiction commented, "1 was not returned and 1 was returned after the 11/18 deadline."
West Virginia	Cannot track type of UOCAVA absentee ballot application.
Wyoming	Fifteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Table 14. UOCAVA Ballots Counted: Type of Voter

Questions B8 and B9. Number of UOCAVA ballots (regular plus FWAB) counted by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B8	
Arkansas	One county commented that one ballot was not counted because the signature did not match.
Florida	One jurisdiction stated that this includes the 10 day count.
Iowa	All counties commented, "include special write-in absentee ballots."
Kentucky	Forty-three counties stated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Thirty-one counties indicated, "No rejected ballots." Sixteen counties indicated, "No FWAB." Twenty-five counties indicated, "No FWAB/No rejected ballots." Two counties stated they had no ballots returned. One county indicated "No non-military overseas."
New Mexico	One county commented that it included FWABs. Another county commented, "UOCAVA Report/PSR Report." A third county noted that its absentee board entered these as regular absentee ballots.
Nevada	One county commented, "50 UOCAVA regular and 8 FWAB."
Oregon	All counties indicated, "Number of ballots accepted for counting."
Vermont	One jurisdiction commented, "1 of 2 non-military voters returned ballot after voting day." Another jurisdiction indicated, "0."
Wyoming	One county commented, "34, 11, 15."

Question B9	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA ballots.
California	One county commented, "13." Another county stated that FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9,B10,B11 and B12) c's are N/A.
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Twenty-one counties indicated no FWAB/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWAB. Three counties indicated no ballots returned.
Missouri	One county commented, "B9b: Federal Write in Ballots."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
South Carolina	One jurisdiction stated that "counted" means only that the ballot was returned on time and submitted for counting.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request," and provided counts for each of these categories.

Question		B9b		B10b			B11b			B12b			calc	

Tables 15, 16 and 17. UOCAVA Ballots Counted: Type of Ballot for All Voters; Uniformed; Civilian

Questions B8, B9, B10, B11, and B12. Number of UOCAVA ballots (regular plus FWAB) counted by type of ballot and type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B8	
Arkansas	One county commented that one ballot was not counted because the signature did not match.
Florida	One jurisdiction stated that this includes the 10 day count.
Iowa	All counties commented, "include special write-in absentee ballots."
Kentucky	Forty-three counties stated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Thirty-one counties indicated, "No rejected ballots." Sixteen counties indicated, "No FWAB." Twenty-five counties indicated, "No FWAB/No rejected ballots." Two counties stated they had no ballots returned. One county indicated "No non-military overseas."
New Mexico	One county commented that it included FWABs. Another county commented, "UOCAVA Report/PSR Report." A third county noted that its absentee board entered these as regular absentee ballots.
Nevada	One county commented, "50 UOCAVA regular and 8 FWAB."
Oregon	All counties indicated, "Number of ballots accepted for counting."
Vermont	One jurisdiction commented, "1 of 2 non-military voters returned ballot after voting day." Another jurisdiction indicated, "0."
Wyoming	One county commented, "34, 11, 15."

Question B9	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA ballots.
California	One county commented, "13." Another county stated that FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9, B10, B11 and B12) c's are N/A.
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Twenty-one counties indicated no FWAB/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWAB. Three counties indicated no ballots returned.
Missouri	One county commented, "B9b: Federal Write in Ballots."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
South Carolina	One jurisdiction stated that "counted" means only that the ballot was returned on time and submitted for counting.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Tables 15, 16 and 17. UOCAVA Ballots Counted: Type of Ballot for All Voters; Uniformed; Civilian

Questions B8, B9, B10, B11, and B12. Number of UOCAVA ballots (regular plus FWAB) counted by type of ballot and type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B10	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA.
California	One county commented, "13." Another county stated FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9, B10, B11 and B12) c's are N/A.
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWABs counted. Twenty counties indicated no FWABs/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWABs. Three counties indicated no ballots returned.
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
South Carolina	One jurisdiction stated that "counted" means only that the ballot was returned on time and submitted for counting.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question B11	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA.
California	One county commented, "13." Another county stated FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9,B10,B11 and B12) c's are N/A.
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWABs counted. Twenty counties indicated no FWABs/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWABs. Three counties indicated no ballots returned.
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
South Carolina	One jurisdiction stated that "counted" means only that the ballot was returned on time and submitted for counting.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Tables 15, 16 and 17. UOCAVA Ballots Counted: Type of Ballot for All Voters; Uniformed; Civilian

Questions B8, B9, B10, B11, and B12. Number of UOCAVA ballots (regular plus FWAB) counted by type of ballot and type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B12	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA.
California	One county commented, "13." Another county stated FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9,B10,B11 and B12) c's are N/A. A third county indicated, "B12 State write-in absentee ballots."
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWABs counted. Twenty counties indicated no FWABs/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWABs. Three counties indicated no ballots returned.
New Hampshire	B12 "OTHER" = Federal Ballot Only
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Table 18. UOCAVA Ballots: Counted as Percentage of Cast, by Type of Voter

Questions B3, B4, B8, B9. Number of UOCAVA ballots (regular plus FWAB) submitted for counting and counted by type of voter.

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B3	
Arkansas	One jurisdiction reported that “2 were FWAB” and a second reported that “3 were FWAB.” Three counties responded to the data validation check and explained that “Pursuant to the question from the AP, the numbers that were reported to the AP were taken from the Power Profile database in December 2010.” This could have been downloaded before the County Clerk entered in all of their data therefore causing a discrepancy in numbers. The AP shows that Chicot County counted 147 Absentee ballots. The numbers that are being reported in the EAC Survey for Chicot County are 196 (1 UOCAVA, 195 Domestic Civilian). In the second county, the AP shows that Drew County counted 117 Absentee ballots. In the third county, the AP shows that Lawrence County counted 88 Absentee ballots. The numbers that are being reported in the EAC Survey for Lawrence County are 98 (0 UOCAVA, 98 Domestic Civilian). The numbers that are being reported in the EAC Survey for Drew County are 146 (2 FWAB, 144 Domestic Civilian). Clay County indicated that it only had absentee ballots. One county indicated that B3a was the “same as B2.” One county indicated that it “received 3 FWAB’s” and a second indicated that it “received 1 FWAB.” One county explained that it received 2 FWABs that it did not send out. Another county explained that “According to the directions above for B3a, the number requested is the total number of ballots submitted for counting (this number includes both that were later counted, and those that were rejected). A breakdown of these ballots are as follows: 4(B1a) ballots were transmitted, 4 (B3a) ballots were returned by voters and submitted for counting, 3 ballots were counted, 1 (B13a) ballot was rejected.” One jurisdiction reported that “one voter returned ballot from the Internet that he had printed off. Ballot was counted.” Finally, one county indicated that it received 4 UOCABA ballots that were transmitted and 2 FWAB Ballots.
Arizona	Maricopa County had FWABs returned; however none were submitted for counting because the voters submitted regular absentee ballots.
California	One county indicated that its system would not give a separate total for these ballots. A second county indicated that No FWAB ballots were received. A third county indicated that “B3a: 13 - Returned SD1 FWABs.”
Colorado	In Colorado, a UOCAVA may submit a FWAB or SWAB as a safeguard. The State absentee will be counted if it is received by the deadline, otherwise the FWAB or SWAB will be counted. In addition, the number returned may differ from the number counted because in Colorado, a UOCAVA may submit a FWAB or SWAB as a safeguard. The State absentee will be counted if it is received by the deadline, otherwise the FWAB or SWAB will be counted.
Florida	One county indicated that B3a includes 2 absentee ballot rejects that were not captured in our voter registration database (VR); this is why B3a is different from B2a. Where possible data included in this survey reflects actual or true number of physical items or occurrences and not simply transactions automatically recorded by our software. The county is highly confident in the numbers provided. Another county indicated that B3a includes 1 FWAB (submitted by voter but not transmitted to voter). A third county indicated that 6 FWABs were received.
Missouri	Christian County reported that it counted the e-mailed ballots in with this total. A second county indicated that the B2a total is off by 2 voters because the ballots should be counted as FWAB. Laclede County reported that it did not have any FWABs.
Mississippi	One jurisdiction indicated that no Federal Write-In Ballots were transmitted for the 2010 General Election. Another county reported that when trying to “pull out of county it is only pulling two people without county marked.”
New Jersey	In New Jersey B3 is Received + Accepted + Rejected ballots
New Mexico	In New Mexico, B3 includes absentee ballots received that were not counted in the general election for reasons other than late receipt.
Nevada	One county indicated that B3 includes 5 FWABs.
Ohio	One jurisdiction explained that some FWABs were received, but the actual ballot was returned in time and was counted in the place of the FWAB. A second jurisdiction indicated that 8 Ballots were FWABs and 2 of the 8 ballots met the criteria to be counted and a third specified that B3 includes 5 regular ballots and 1 federal. Another jurisdiction indicated that other ballots came back as undeliverable.
Oklahoma	One county indicated that the only ballot returned in the county was a FWAB and it was counted.
South Dakota	One county specified that 1 was counted, 5 arrived too late, and 1 never requested a ballot. A second indicated that there were 2 total votes. A third county explained that $123 + 8$ (FWAB) = 131.
Vermont	One county explained that none were transmitted.

Table 18. UOCAVA Ballots: Counted as Percentage of Cast, by Type of Voter

Questions B3, B4, B8, B9. Number of UOCAVA ballots (regular plus FWAB) submitted for counting and counted by type of voter.

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B4	
Arkansas	One county commented that its county clerk's office does not see the FWABs after they are opened to know if they are uniformed service or overseas civilian voters.
Arizona	One county commented that it did not track FWABs and UOCAVA ballots.
California	One county commented "Application method." Another county noted that FWABs are not tracked by type; all were added into uniformed services voters. A third county stated that FWAB stats are included in the overall counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballot types in the same statistic (included in B4).
Florida	One county commented, "Data: VR EAC report."
Iowa	Seventy-nine counties commented, "We are unable to distinguish the UOCAVA ballots returned from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots returned in B4c."
Missouri	In response to question B4, four counties noted that FWABs are not transmitted to UOCAVA voters but are received.
New Mexico	One county commented, "UOCAVA Report/PSR Report."
Oregon	Oregon does not track what type of ballot is returned.
Vermont	For questions B4 through B7, one jurisdiction commented, "1 was not returned and 1 was returned after the 11/18 deadline."
West Virginia	Cannot track type of UOCAVA absentee ballot application.
Wyoming	Fifteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Table 18. UOCAVA Ballots: Counted as Percentage of Cast, by Type of Voter

Questions B3, B4, B8, B9. Number of UOCAVA ballots (regular plus FWAB) submitted for counting and counted by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B8	
Arkansas	One county commented that one ballot was not counted because the signature did not match.
Florida	One jurisdiction stated that this includes the 10 day count.
Iowa	All counties commented, "include special write-in absentee ballots."
Kentucky	Forty-three counties stated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Thirty-one counties indicated, "No rejected ballots." Sixteen counties indicated, "No FWAB." Twenty-five counties indicated, "No FWAB/No rejected ballots." Two counties stated they had no ballots returned. One county indicated "No non-military overseas."
New Mexico	One county commented that it included FWABs. Another county commented, "UOCAVA Report/PSR Report." A third county noted that its absentee board entered these as regular absentee ballots.
Nevada	One county commented, "50 UOCAVA regular and 8 FWAB."
Oregon	All counties indicated, "Number of ballots accepted for counting."
Vermont	One jurisdiction commented, "1 of 2 non-military voters returned ballot after voting day." Another jurisdiction indicated, "0."
Wyoming	One county commented, "34, 11, 15."

Question B9	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA ballots.
California	One county commented, "13." Another county stated that FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9,B10,B11 and B12) c's are N/A.
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Twenty-one counties indicated no FWAB/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWAB. Three counties indicated no ballots returned.
Missouri	One county commented, "B9b: Federal Write in Ballots."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
South Carolina	One jurisdiction stated that "counted" means only that the ballot was returned on time and submitted for counting.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question		B8		B10a+b+c		calc	B11a+b+c		calc	B12a+b+c		calc	calc	calc

Table 19. UOCAVA Ballots: Counted by Type of Ballot

Questions B8, B10, B11, and B12. Number of UOCAVA ballots (regular plus FWAB) counted by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B8	
Arkansas	One county commented that one ballot was not counted because the signature did not match.
Florida	One jurisdiction stated that this includes the 10 day count.
Iowa	All counties commented, "include special write-in absentee ballots."
Kentucky	Forty-three counties stated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Thirty-one counties indicated, "No rejected ballots." Sixteen counties indicated, "No FWAB." Twenty-five counties indicated, "No FWAB/No rejected ballots." Two counties stated they had no ballots returned. One county indicated "No non-military overseas."
New Mexico	One county commented that it included FWABs. Another county commented, "UOCAVA Report/PSR Report." A third county noted that its absentee board entered these as regular absentee ballots.
Nevada	One county commented, "50 UOCAVA regular and 8 FWAB."
Oregon	All counties indicated, "Number of ballots accepted for counting."
Vermont	One jurisdiction commented, "1 of 2 non-military voters returned ballot after voting day." Another jurisdiction indicated, "0."
Wyoming	One county commented, "34, 11, 15."

Question B10	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA.
California	One county commented, "13." Another county stated FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9, B10, B11 and B12) c's are N/A.
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWABs counted. Twenty counties indicated no FWABs/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWABs. Three counties indicated no ballots returned.
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
South Carolina	One jurisdiction stated that "counted" means only that the ballot was returned on time and submitted for counting.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Table 19. UOCAVA Ballots: Counted by Type of Ballot

Questions B8, B10, B11, and B12. Number of UOCAVA ballots (regular plus FWAB) counted by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B11	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA.
California	One county commented, "13." Another county stated FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9,B10,B11 and B12) c's are N/A.
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWABs counted. Twenty counties indicated no FWABs/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWABs. Three counties indicated no ballots returned.
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
South Carolina	One jurisdiction stated that "counted" means only that the ballot was returned on time and submitted for counting.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question B12	
Arkansas	One county stated it does not know how many of its 37 not counted were UOCAVA.
Arizona	One county indicated it did not track FWABs and UOCAVA.
California	One county commented, "13." Another county stated FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9,B10,B11 and B12) c's are N/A. A third county indicated, "B12 State write-in absentee ballots."
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWABs counted. Twenty counties indicated no FWABs/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWABs. Three counties indicated no ballots returned.
New Hampshire	All counties commented, "B12 'OTHER' = Federal Ballot Only."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question		B13		B15a			B15b			B15c			calc	

Table 20. UOCAVA Ballots Rejected: Type of Voter

Questions B13 and B15. Number of UOCAVA ballots (regular plus FWAB) rejected by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B13	
Arkansas	One county commented, "Don't remember many at all (maybe 5 or 6). A couple of federal write-ins had no way of identifying who mailed them. One or two were copied from SAMPLES." Another county indicated five ballots were not returned for unknown reasons. A third county indicated, "Voter not registered."
Arizona	FWABs were not transmitted by La Paz County but one (1) FWAB was received, thus increasing this county's total in B13a to 2.
California	One county indicated the voter signature did not match.
Florida	One county commented, "Data: VR EAC Report." A second county indicated that the voter signature was different.
Iowa	B13 includes UOCAVA absentee ballots that were transmitted and rejected as well as FWABs and special write-in absentee ballots rejected. This number may be higher than the number of ballots transmitted.
Michigan	For all counties, initial decisions on rejected absentee ballots & FWAB's are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.
Missouri	Two counties indicated, "Ballot received too late. "
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	Six counties indicated that B1a does not include FWABs. Another county indicated, "FWABs."
Ohio	Two counties commented that the number of rejected ballot is included in the number of ballots submitted for counting; therefore, these ballots are counted twice per the survey error code calculation.
South Dakota	One county stated these ballots were returned after the general election; one was mailed on October 29 and was not received until November 29. Another county indicated, "4 not returned, 2 arrived after the election." A third county indicated one UOCAVA voter (civilian) returned his absentee ballot after the deadline was past.
West Virginia	No tracking.
Wyoming	One county indicated, "FWAB."

Table 20. UOCAVA Ballots Rejected: Type of Voter

Questions B13 and B15. Number of UOCAVA ballots (regular plus FWAB) rejected by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B15	
Arkansas	One county indicated its clerk's office does not see FWABs after it is opened.
California	One county noted its FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots using the same statistic.
Florida	One county commented, "53 combined total; 25 absentee, 28 FWAB. No military/civilian breakdown." Another county indicated no UOCAVA ballots were rejected. A third county stated that B15c, B16c, B17c, and B18c are all not applicable.
Iowa	Twenty-eight counties stated, "We are unable to distinguish the UOCAVA ballots rejected from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots rejected in B15c."
Kentucky	Forty-seven counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB rejected ballots. Twenty-three counties indicated they had no FWABs/no rejected ballots. Thirty-two counties indicated they had no rejected ballots. Fifteen counties indicated they had no FWABs. Three counties indicated they had no ballots returned.
New Hampshire	All counties commented, "UOCAVA 'Other' = Fed Ballot Only."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated no UOCAVA ballots were issued or received. A second county indicated no UOCAVA ballots were rejected. A third county indicated no FWABs were received.
Oregon	Do not track what type of ballot rejected.
Tennessee	One county stated that ballots received by mail after the deadline are not opened.
West Virginia	No tracking.
Wyoming	Five counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question		B15b		B16b			B17b			B18b			calc	

Tables 21, 22, and 23. UOCAVA Ballots Rejected: Type of Ballot for All Voters; Uniformed; and Civilian

Questions B13, B15, B16, B17, and B18. Number of UOCAVA ballots (regular plus FWAB) rejected by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B13	
Arkansas	One county commented, "Don't remember many at all (maybe 5 or 6). A couple of federal write-ins had no way of identifying who mailed them. One or two were copied from SAMPLES." Another county indicated five ballots were not returned for unknown reasons. A third county indicated, "Voter not registered."
Arizona	FWABs were not transmitted by La Paz County but one (1) FWAB was received, thus increasing this county's total in B13a to 2.
California	One county indicated the voter signature did not match.
Florida	One county commented, "Data: VR EAC Report." A second county indicated that the voter signature was different.
Iowa	B13 includes UOCAVA absentee ballots that were transmitted and rejected as well as FWABs and special write-in absentee ballots rejected. This number may be higher than the number of ballots transmitted.
Michigan	For all counties, initial decisions on rejected absentee ballots & FWAB's are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.
Missouri	Two counties indicated, "Ballot received too late. "
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	Six counties indicated that B1a does not include FWAB ballots. Another county indicated, "FWABs."
Ohio	Two counties commented that the number of rejected ballot is included in the number of ballots submitted for counting; therefore, these ballots are counted twice per the survey error code calculation.
South Dakota	One county stated these ballots were returned after the general election; one was mailed on October 29 and was not received until November 29. Another county indicated, "4 not returned, 2 arrived after the election." A third county indicated one UOCAVA voter (civilian) returned his absentee ballot after the deadline was past.
West Virginia	No tracking.
Wyoming	One county indicated, "FWAB."

Tables 21, 22, and 23. UOCAVA Ballots Rejected: Type of Ballot for All Voters; Uniformed; and Civilian

Questions B13, B15, B16, B17, and B18. Number of UOCAVA ballots (regular plus FWAB) rejected by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B15	
Arkansas	One county indicated its clerk's office does not see FWABs after it is opened.
California	One county noted its FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots using the same statistic.
Florida	One county commented, "53 combined total; 25 absentee, 28 FWAB. No military/civilian breakdown." Another county indicated no UOCAVA ballots were rejected. A third county stated that B15c, B16c, B17c, and B18c are all not applicable.
Iowa	Twenty-eight counties stated, "We are unable to distinguish the UOCAVA ballots rejected from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots rejected in B15c."
Kentucky	Forty-seven counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB rejected ballots. Twenty-three counties indicated they had no FWABs/no rejected ballots. Thirty-two counties indicated they had no rejected ballots. Fifteen counties indicated they had no FWABs. Three counties indicated they had no ballots returned.
New Hampshire	All counties commented, "UOCAVA 'Other' = Fed Ballot Only."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated no UOCAVA ballots were issued or received. A second county indicated no UOCAVA ballots were rejected. A third county indicated no FWABs were received.
Oregon	Do not track what type of ballot rejected.
Tennessee	One county stated that ballots received by mail after the deadline are not opened.
West Virginia	No tracking.
Wyoming	Five counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Tables 21, 22, and 23. UOCAVA Ballots Rejected: Type of Ballot for All Voters; Uniformed; and Civilian

Questions B13, B15, B16, B17, and B18. Number of UOCAVA ballots (regular plus FWAB) rejected by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B16	
Arkansas	One county indicated its clerk's office does not see FWABs after it is opened.
California	One county noted its FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots using the same statistic.
Florida	One county commented, "53 combined total; 25 absentee, 28 FWAB. No military/civilian breakdown." Another county indicated no UOCAVA ballots were rejected. A third county stated that B15c, B16c, B17c, and B18c are all not applicable.
Iowa	Twenty-eight counties stated, "We are unable to distinguish the UOCAVA ballots rejected from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots rejected in B15c."
Kentucky	Forty-seven counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB rejected ballots. Twenty-three counties indicated they had no FWABs/no rejected ballots. Thirty-two counties indicated they had no rejected ballots. Fifteen counties indicated they had no FWABs. Three counties indicated they had no ballots returned.
New Hampshire	All counties commented, "UOCAVA 'Other' = Fed Ballot Only."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated no UOCAVA ballots were issued or received. A second county indicated no UOCAVA ballots were rejected. A third county indicated no FWABs were received.
Oregon	Do not track what type of ballot rejected.
Tennessee	One county stated that ballots received by mail after the deadline are not opened.
West Virginia	No tracking.
Wyoming	Five counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Tables 21, 22, and 23. UOCAVA Ballots Rejected: Type of Ballot for All Voters; Uniformed; and Civilian

Questions B13, B15, B16, B17, and B18. Number of UOCAVA ballots (regular plus FWAB) rejected by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B17	
Arkansas	One county indicated its clerk's office does not see FWAB after it is opened.
Arizona	For B17 FWAB, one county stated the "zero" total noted is not an indication that this was not tracked or not applicable but instead, of the 204 FWAB's returned, all were valid and counted and as such, none (i.e. zero) were rejected.
California	One county noted its FWAB statistics are included in counts for all UOCAVA ballots. Another county indicated that for B17a and B17c, FWABs rejected are those of non-UOCAVA voters or unregistered voters.
Connecticut	Connecticut currently accounts for all ballots using the same statistic.
Florida	One county commented, "53 combined total; 25 absentee, 28 FWAB. No military/civilian breakdown." Another county indicated no UOCAVA ballots were rejected. A third county stated that B15c, B16c, B17c, and B18c are all not applicable.
Iowa	Twenty-eight counties stated, "We are unable to distinguish the UOCAVA ballots rejected from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots rejected in B15c."
Kentucky	Forty-seven counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB rejected ballots. Twenty-three counties indicated they had no FWABs/no rejected ballots. Thirty-two counties indicated they had no rejected ballots. Fifteen counties indicated they had no FWABs. Three counties indicated they had no ballots returned.
New Hampshire	All counties commented, "UOCAVA 'Other' = Fed Ballot Only."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated no UOCAVA ballots were issued or received. A second county indicated no UOCAVA ballots were rejected. A third county indicated no FWABs were received.
Oregon	Do not track what type of ballot rejected.
Tennessee	One county stated that ballots received by mail after the deadline are not opened.
West Virginia	No tracking.
Wyoming	Five counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question B18	
Arkansas	Two counties explained that they did not have any UOCAVA ballots that were rejected.
Arizona	One county indicated that the total includes 37 ballots that were returned too late (after 7pm on Election Day). If it excludes those 37 ballots that were not real "countable" rejects, there were then only 7 "Uniformed services voters" and 8 "Non-military/civilian overseas voters" (total of 15) that had possible "countable" ballots that were rejected.
California	One county indicated that it does not catalog military/civilian data, only domestic/foreign data and answers in a and b are domestic/foreign, not military/civilian. Los Angeles County indicated that the majority of UOCAVA Voters on the Los Angeles County Vote By Mail file are simply categorized as "FPCA" without military/civilian distinction. One county indicated that it does not have a method for tracking stateside military returns, nor is it able to differentiate between ballots returned by overseas citizens and overseas military.
Minnesota	Minnesota explained that it does not have any other type of ballot to report.
South Carolina	In South Carolina, there was no "other type" of UOCAVA ballot. In addition, no differentiation was made between state-issued ballots and FWABs. Data on ballots that were rejected only include ballots that missed the deadline. No data were available specifically for UOCAVA ballots rejected for other reasons (e.g., provisionals).

Tables 21, 22, and 23. UOCAVA Ballots Rejected: Type of Ballot for All Voters; Uniformed; and Civilian

Questions B13, B15, B16, B17, and B18. Number of UOCAVA ballots (regular plus FWAB) rejected by type of ballot

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B18	
Arkansas	One county indicated its clerk's office does not see FWAB after it is opened.
California	One county noted its FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots using the same statistic.
Florida	One county commented, "53 combined total; 25 absentee, 28 FWAB. No military/civilian breakdown." Another county indicated no UOCAVA ballots were rejected. A third county stated that B15, B16, B17, and B18 C's are all not applicable.
Iowa	Twenty-eight counties stated, "We are unable to distinguish the UOCAVA ballots rejected from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots rejected in B15c."
Kentucky	Forty-seven counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB rejected ballots. Twenty-three counties indicated they had no FWABs/no rejected ballots. Thirty-two counties indicated they had no rejected ballots. Fifteen counties indicated they had no FWABs. Three counties indicated they had no ballots returned.
New Hampshire	All counties commented, "UOCAVA 'Other' = Fed Ballot Only."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated no UOCAVA ballots were issued or received. A second county indicated no UOCAVA ballots were rejected. A third county indicated no FWABs were received.
Oregon	Do not track what type of ballot rejected.
Tennessee	One county stated that ballots received by mail after the deadline are not opened.
West Virginia	No tracking.
Wyoming	Five counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Table 24. UOCAVA Ballots Rejected: Reason for Rejection

Questions B13 and B14. Number of UOCAVA ballots (regular plus FWAB) rejected by reason for rejection

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B13	
Arkansas	One county commented, "Don't remember many at all (maybe 5 or 6). A couple of federal write-ins had no way of identifying who mailed them. One or two were copied from SAMPLES." Another county indicated five ballots were not returned for unknown reasons. A third county indicated, "Voter not registered."
Arizona	FWABs were not transmitted by La Paz County but one (1) FWAB was received, thus increasing this county's total in B13a to 2.
California	One county indicated the voter signature did not match.
Florida	One county commented, "Data: VR EAC Report." A second county indicated that the voter signature was different.
Iowa	B13 includes UOCAVA absentee ballots that were transmitted and rejected as well as FWABs and special write-in absentee ballots rejected. This number may be higher than the number of ballots transmitted.
Michigan	For all counties, initial decisions on rejected absentee ballots & FWAB's are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.
Missouri	Two counties indicated, "Ballot received too late. "
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	Six counties indicated that B1a does not include FWAB ballots. Another county indicated, "FWABs."
Ohio	Two counties commented that the number of rejected ballot is included in the number of ballots submitted for counting; therefore, these ballots are counted twice per the survey error code calculation.
South Dakota	One county stated these ballots were returned after the general election; one was mailed on October 29 and was not received until November 29. Another county indicated, "4 not returned, 2 arrived after the election." A third county indicated one UOCAVA voter (civilian) returned his absentee ballot after the deadline was past.
West Virginia	No tracking.
Wyoming	One county indicated, "FWAB."

Table 24. UOCAVA Ballots Rejected: Reason for Rejection

Questions B13 and B14. Number of UOCAVA ballots (regular plus FWAB) rejected by reason for rejection

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Question B14	
Arkansas	One county indicated, "No voter statements." A second county indicated, "Signature did not match."
Arizona	One county noted that all B14b "Problem with voter signature" (4 total) were due to lack of signature (NO SIG) on voter's returned affidavit, and not because of a non-matching signature.
California	One county indicated that "No Standard Oath" is another category, and there were 3 instances of this. Another county commented that California does not have a postmark provision in code.
Connecticut	Non-compliance with law.
Florida	One county commented, "Data: VR EAC Report." Another county indicated, "invalid signature." A third county commented, in regards to B14a, that ballots received after the deadline are "invalid" and, therefore, no official action is required to "reject" them. This county also commented, "As of 01/02/13, we received 78 'late' ballots from UOCAVA voters." A fourth county indicate that it had 8 FWABs that did not have a prior request for an absentee ballot.
Michigan	"Other" rejections include FWABs that were not needed as regular absentee ballots had arrived in time to be counted.
Minnesota	Signature problem also includes neither signature nor number matches application.
Missouri	One county commented, "Ballot envelope not signed." Another county commented in regards to B14d that it received an absentee ballot that did not provide a ballot, but only an affidavit.
New Jersey	Two counties commented, "Same ballot has been rejected for multiple reasons."
New Mexico	One county indicated the FPCA was never received; 25 sent FWABs only. Another county commented, "UOCAVA Report/PSR Report."
New York	The number in B14c includes those ballots which either lacked a postmark or were received timely, but had a postmark past Election Day. Reasons for rejecting the ballots represented by the numbers shown in B14d included the following common explanations given: duplicate ballots from a single voter, FWABs received from unqualified voters, ballots without security envelopes, and voters who had either died or voted at the polls.
West Virginia	No tracking.
Wyoming	One county indicated that it did not record reasons for ballot rejection. Another county commented, "B14b: there was no signature."

2012 Election Administration and Voting Survey

Tables 25, 26 and 27. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian

Questions B1, B3, B4, B8, B9, B13, and B15. Number of UOCAVA ballots submitted for counting as a percentage of transmitted ballots; counted, or rejected as a percentage of submitted by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Note: The "Ballots Transmitted" in this table includes the numbers from B1 and the numbers from B6, as appropriate, to include the FWABs.

Question B1	
Arkansas	One county reported one ballot counted, one not returned, and one returned too late. Another county stated, "B1d: Not transmitted-sent FWAB in."
Arizona	One county commented, "Arizona allows for 'electronic' distribution and return of UOCAVA ballots. Of the 7,697 early ballots sent to UOCAVA voters, 4,891 (64%) were sent electronically (via email or fax), per the voter's request, which allowed for instantaneous receipt of the ballot by the UOCAVA voter. 2,161 of the electronically-sent ballots were to 'Uniformed Service' voters and 2,730 of the electronically-sent ballots were sent to 'Non-Military/Civilian Overseas' voters." A second county stated that federal write-in ballots are not "transmitted" to the UOCAVA voters, but they were included as such. A third county stated, in regards to B1d, that one voter contacted the office regarding voting in the general election; the office requested a completed FPCA, but the voter did not comply.
California	One county commented, "B1d-replacement ballot."
Florida	Bay County stated, "Bay County ran the numbers again, and they are correct. Bay County has a vast amount of UOCAVA voters due to the two bases, Tyndall Air Force Base and US Navy Base." Another county indicated this data was drawn from VR EAC Report. Escambia County commented, "VR Systems has been working with Escambia County on this survey. Escambia County has double-checked the total in B1a and feels it is correct as is. They do not understand how there can be an upper limit on the number/percentage of any type of absentee or other ballot compared to total registered voters. Escambia County has a very large number of UOCAVA voters." Okaloosa County stated, "Okaloosa County has double-checked the total in B1a and feel it is correct as is. Okaloosa County is home to the largest Air Force base in the world with additional forces representing all five services branches--Army, Navy, Marine Corps, and Coast Guard." Santa Rosa County commented, "Santa Rosa has double-checked the total in B1a and feel it is correct as is. Santa Rosa County has 15,783 UOCAVA voters registered. They have one military installation in their county and two others in neighboring counties."
Maine	Three jurisdictions commented that the total UOCAVA figures are correct.
Missouri	One county stated, "1 came to office to vote." A second counted indicated, "military base."
New Hampshire	Two jurisdictions commented that B1 reflected multiple requests from single individuals.
New Mexico	Another county stated, "UOCAVA Report/PSR Report."
Rhode Island	All jurisdictions commented that recent changes to Rhode Island General Law consolidated all UOCAVA ballots into one mail ballot category.
Tennessee	One county stated that its system does not designate between military and overseas voters; all are coded the same, and the total should be 278. The county also stated that it is home to Fort Campbell military base, which is why UOCAVA voters exceed domestic absentee voters.
Vermont	One jurisdiction indicated that only overseas ballots were included. Another jurisdiction noted there may be some military voters that were included in the county of 21 overseas voters because they did not specify if they were in the military. A third jurisdiction indicated that it received no requests at all for overseas ballots.
Washington	Four counties indicated they had a high number of UOCAVA ballots due to military bases.
Wyoming	For all counties, B1a does not include FWABs.

Tables 25, 26 and 27. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian

Questions B1, B3, B4, B8, B9, B13, and B15. Number of UOCAVA ballots submitted for counting as a percentage of transmitted ballots; counted, or rejected as a percentage of submitted by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Note: The "Ballots Transmitted" in this table includes the numbers from B1 and the numbers from B6, as appropriate, to include the FWABs.

Question B3	
Arkansas	One county indicated, "11 UOCAVA, 1 Write-In, 1 Civilian," and a second county stated that two ballots were FWABs. A third county indicated that it was unable to track FWABs. Another county stated that these UOCAVA ballots were the 7 that were returned and submitted for counting.
Arizona	FWABs were not transmitted by La Paz County, but one (1) FWAB was received, thus increasing the total in B3a to 7.
California	One county stated, "application method." A second county commented, "Ballots 2109 FWABs 87."
Florida	One county indicated, "2 FWAB," and another county indicated, "5 FWAB." A third county stated that B2a does not include 33 FWABs returned from voters who were not registered for this election and 2 regular ballots returned for another county. A fourth county commented, "AB 1659 + FWAB 74."
Iowa	Includes ballots transmitted as well as FWABs and special write-in absentee ballots returned. This number may be higher than the number of ballots transmitted.
Idaho	Seven counties noted that there were 54, 3, 15, 2, 1, 16 and 5 FWABs received, respectively, without the voter having previously requested an absentee ballot from the County Clerk's Office. These FWABs were not counted. These and six other counties commented, "Received Warning 'B13a + B3a cannot exceed B1a' for this county. But B3a includes all ballots returned, including those that were later rejected. You can't add B3a and B13a to get B1a, as B3a already includes B3a."
Missouri	One county stated that it received two FWABs.
North Dakota	Forty-seven counties stated, "Zero FWAB." 4 counties indicated, "One FWAB." One county stated, "Three FWAB," and another county indicated, "Six FWAB."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated "133 UOCAVA + 20 FWABs." Four counties stated, "B3a is greater than B1a due to the FWAB ballots received."

Tables 25, 26 and 27. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian

Questions B1, B3, B4, B8, B9, B13, and B15. Number of UOCAVA ballots submitted for counting as a percentage of transmitted ballots; counted, or rejected as a percentage of submitted by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Note: The "Ballots Transmitted" in this table includes the numbers from B1 and the numbers from B6, as appropriate, to include the FWABs.

Question B4	
Arkansas	One county commented that its county clerk's office does not see the FWABs after they are opened to know if they are uniformed service or overseas civilian voters.
Arizona	One county commented that it did not track FWABs and UOCAVA ballots.
California	One county commented "Application method." Another county noted that FWABs are not tracked by type; all were added into uniformed services voters. A third county stated that FWAB stats are included in the overall counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballot types in the same statistic (included in B4).
Florida	One county commented, "Data: VR EAC report."
Iowa	Seventy-nine counties commented, "We are unable to distinguish the UOCAVA ballots returned from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots returned in B4c."
Missouri	In response to question B4, four counties noted that FWABs are not transmitted to UOCAVA voters but are received.
New Mexico	One county commented, "UOCAVA Report/PSR Report."
Oregon	Oregon does not track what type of ballot is returned.
Vermont	For questions B4 through B7, one jurisdiction commented, "1 was not returned and 1 was returned after the 11/18 deadline."
West Virginia	Cannot track type of UOCAVA absentee ballot application.
Wyoming	Fifteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Question B8	
Arkansas	One county commented that one ballot was not counted because the signature did not match.
Florida	One jurisdiction stated that this includes the 10 day count.
Iowa	All counties commented, "include special write-in absentee ballots."
Kentucky	Forty-three counties stated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Thirty-one counties indicated, "No rejected ballots." Sixteen counties indicated, "No FWAB." Twenty-five counties indicated, "No FWAB/No rejected ballots." Two counties stated they had no ballots returned. One county indicated "No non-military overseas."
New Mexico	One county commented that it included FWABs. Another county commented, "UOCAVA Report/PSR Report." A third county noted that its absentee board entered these as regular absentee ballots.
Nevada	One county commented, "50 UOCAVA regular and 8 FWAB."
Oregon	All counties indicated, "Number of ballots accepted for counting."
Vermont	One jurisdiction commented, "1 of 2 non-military voters returned ballot after voting day." Another jurisdiction indicated, "0."
Wyoming	One county commented, "34, 11, 15."

Tables 25, 26 and 27. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian

Questions B1, B3, B4, B8, B9, B13, and B15. Number of UOCAVA ballots submitted for counting as a percentage of transmitted ballots; counted, or rejected as a percentage of submitted by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Note: The "Ballots Transmitted" in this table includes the numbers from B1 and the numbers from B6, as appropriate, to include the FWABs.

Question B9	
Arkansas	One county stated it does not know how many of its 37 ballots not counted were UOCAVA ballots.
Arizona	One county indicated it did not track FWABs and UOCAVA ballots.
California	One county commented, "13." Another county stated that FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots with the same statistic (B9).
Florida	One county indicated, "Data: VR EAC Report." Another county commented that all (B9,B10,B11 and B12) c's are N/A.
Iowa	Seventy-four counties commented, "We are unable to distinguish the UOCAVA ballots counted from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots counted in B9c."
Kentucky	Fifty counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB counted. Twenty-one counties indicated no FWAB/no rejected ballots. Twenty-six counties indicated no rejected ballots. Twenty counties indicated no FWAB. Three counties indicated no ballots returned.
Missouri	One county commented, "B9b: Federal Write in Ballots."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Oregon	Do not track what type of ballot accepted.
South Carolina	One jurisdiction stated that "counted" means only that the ballot was returned on time and submitted for counting.
West Virginia	No tracking.
Wyoming	Fourteen counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

Tables 25, 26 and 27. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian

Questions B1, B3, B4, B8, B9, B13, and B15. Number of UOCAVA ballots submitted for counting as a percentage of transmitted ballots; counted, or rejected as a percentage of submitted by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Note: The "Ballots Transmitted" in this table includes the numbers from B1 and the numbers from B6, as appropriate, to include the FWABs.

Question B13	
Arkansas	One county commented, "Don't remember many at all (maybe 5 or 6). A couple of federal write-ins had no way of identifying who mailed them. One or two were copied from SAMPLES." Another county indicated five ballots were not returned for unknown reasons. A third county indicated, "Voter not registered."
Arizona	FWABs were not transmitted by La Paz County but one (1) FWAB was received, thus increasing this county's total in B13a to 2.
California	One county indicated the voter signature did not match.
Florida	One county commented, "Data: VR EAC Report." A second county indicated that the voter signature was different.
Iowa	B13 includes UOCAVA absentee ballots that were transmitted and rejected as well as FWABs and special write-in absentee ballots rejected. This number may be higher than the number of ballots transmitted.
Michigan	For all counties, initial decisions on rejected absentee ballots & FWAB's are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.
Missouri	Two counties indicated, "Ballot received too late. "
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	Six counties indicated that B1a does not include FWAB ballots. Another county indicated, "FWABs."
Ohio	Two counties commented that the number of rejected ballot is included in the number of ballots submitted for counting; therefore, these ballots are counted twice per the survey error code calculation.
South Dakota	One county stated these ballots were returned after the general election; one was mailed on October 29 and was not received until November 29. Another county indicated, "4 not returned, 2 arrived after the election." A third county indicated one UOCAVA voter (civilian) returned his absentee ballot after the deadline was past.
West Virginia	No tracking.
Wyoming	One county indicated, "FWAB."

Tables 25, 26 and 27. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian

Questions B1, B3, B4, B8, B9, B13, and B15. Number of UOCAVA ballots submitted for counting as a percentage of transmitted ballots; counted, or rejected as a percentage of submitted by type of voter

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number, the difference is treated as uncategorized responses. If the balance is a negative number (indicated by parentheses), the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Note: The "Ballots Transmitted" in this table includes the numbers from B1 and the numbers from B6, as appropriate, to include the FWABs.

Question B15	
Arkansas	One county indicated its clerk's office does not see FWABs after it is opened.
California	One county noted its FWAB statistics are included in counts for all UOCAVA ballots.
Connecticut	Connecticut currently accounts for all ballots using the same statistic.
Florida	One county commented, "53 combined total; 25 absentee, 28 FWAB. No military/civilian breakdown." Another county indicated no UOCAVA ballots were rejected. A third county stated that B15c, B16c, B17c, and B18c are all not applicable.
Iowa	Twenty-eight counties stated, "We are unable to distinguish the UOCAVA ballots rejected from military overseas voters and civilian overseas voters. We are only able to do so for FWABs and special write-in absentee ballots. Because of this, we placed the total number of UOCAVA ballots rejected in B15c."
Kentucky	Forty-seven counties indicated they were unable to distinguish between UOCAVA absentee ballots and FWAB rejected ballots. Twenty-three counties indicated they had no FWABs/no rejected ballots. Thirty-two counties indicated they had no rejected ballots. Fifteen counties indicated they had no FWABs. Three counties indicated they had no ballots returned.
New Hampshire	All counties commented, "UOCAVA 'Other' = Fed Ballot Only."
New Mexico	One county indicated, "UOCAVA Report/PSR Report."
Nevada	One county indicated no UOCAVA ballots were issued or received. A second county indicated no UOCAVA ballots were rejected. A third county indicated no FWABs were received.
Oregon	Do not track what type of ballot rejected.
Tennessee	One county stated that ballots received by mail after the deadline are not opened.
West Virginia	No tracking.
Wyoming	Five counties indicated, "Unknown: Marked as FPCA or Electronic Ballot Request" and provided counts for each of these categories.

APPENDIX B: QUESTIONNAIRE (UOCAVA Questions Only)

U.S. ELECTION ASSISTANCE COMMISSION

2012 Election Administration & Voting Survey

The ongoing process of improving America's election systems relies in part on having accurate data about the way Americans cast their ballots. In 2002, Congress chartered the U.S. Election Assistance Commission (EAC) to collect information on the state of American elections and make it widely available to policy makers, advocates, scholars, journalists and the general public. Since 2004, the Commission has sponsored a biennial survey as its primary tool for fulfilling that mission. We are pleased to present the 2012 Election Administration and Voting Survey, and we ask for your help in making it the most complete and accurate survey in its history.

The questions below ask for information about ballots cast; voter registration; overseas and military voting; Election Day activities; voting technology; and other important issues. The section concerning the Uniformed and Overseas Citizens Voting Act (UOCAVA) serves as the EAC's standardized format for state reporting of UOCAVA voting information as required by 42 U.S.C. §1973ff-1. States that complete and timely submit this section to the EAC will fulfill their UOCAVA reporting requirement under 42 U.S.C. §1973ff-1(c). Additionally, EAC is mandated by the National Voter Registration Act (NVRA) to collection information from states concerning the impact of that statute on the administration of Federal elections. With this information EAC is required to make a report to Congress and provide recommendations for the improvement of Federal and State procedures, forms, and other NVRA matters. States that timely respond to all questions in this survey concerning voter registration related matters will meet their NVRA reporting requirements under 42 U.S.C. § 1973gg-7 and EAC regulations.

The EAC recognizes the burden that asking for this data places on state and local election officials, and we have worked to minimize that burden as much as possible.

In advance, we thank you for your cooperation and look forward to answering any questions you might have.

SECTION B UNIFORMED & OVERSEAS CITIZENS ABSENTEE VOTING ACT (UOCAVA)

Section B serves as the EAC’s standardized format for the state reporting of UOCAVA voting information as required by 42 U.S.C. §1973ff-1. States that complete and timely submit this section to the EAC will fulfill their UOCAVA reporting requirement under 42 U.S.C §1973ff-1(c).

Pursuant UOCAVA, this section collects various data elements needed to determine: (1) the combined number of absentee ballots transmitted to UOCAVA voters; (2) the combined number of ballots returned by UOCAVA voters; and (3) the combined number of returned ballots cast by UOCAVA voters (the number of cast ballots is practically determined by collecting data concerning the total votes counted and rejected).

Roadmap to Section B:

- B1 and B2 ask for information about the number and type of UOCAVA absentee ballots transmitted.
- B3 asks for the number and type of all UOCAVA ballots returned and submitted for counting.
- B4, B5, B6, and B7 asks for information on the type of UOCAVA ballot returned by type of UOCAVA voter.
- B8 asks for the number and type of all UOCAVA ballots counted.
- B9, B10, B11, and B12 asks for information on the type of UOCAVA ballot counted by type of UOCAVA voter.
- B13 asks for the number and type of all UOCAVA ballots rejected.
- B14 asks for information on reasons why UOCAVA ballots were rejected.
- B15, B16, B17, and B18 asks for information on the type of UOCAVA ballot rejected by type of UOCAVA voter.
